The Biggest Show Window in the World

This week you have a chance to look at a small corner of the biggest show window in the world.

The big window covers the entire continent, and is made up of the combined show windows of live merchants in 400 cities of North America.

What you will see in the shops of our own merchants will be intensely interesting, but the local displays are only units that help to make up the exhibit that stretches from ocean to ocean and from Northern Canada to the Gulf of Mexico.

This big International window is filled exclusively with products that have been advertised by the manufacturers in the newspapers.

The show this year is larger than ever, for it reflects a \$20,000,000 increase in national newspaper advertising in 1916.
