AMERICAN IS BRITISH LORD

Frank Cooper, chief of the information bureau of the office of the district attorney of New York, received word that through the death of his elder brother, Sir Horace Cooper, he succeeds not only to the English baronetcy of his brother, but also to the family estate in England appraised at half a million dollars. Sir Horace's only son, who would have become the baron, was killed in the battle of the Somme. A full-fledged citizen, he will not, he declares, exchange that citizenship for the title. Mr. Cooper, or Lord Cooper, is a nephew of the first Lady Dufferin, and a younger brother, Mrs. Charles Cooper, is now governor of the Western Soldiers' home, near London. Mr. Cooper since becoming an American, has been a newspaper man and an actor.

ports total expenditures for the week \$138.12 for the two departments; \$17.62 is charged to the water department and \$120.50 to the street department; \$47.35 of the \$120.50 was the expense of running gutters and removing snow from the sidewalks.

Street superintendent reports that there are six and one-half miles of gutters bordering the pavements. Thus it will be seen that as he ran all gutters and as there is a gutter on each side of the street, that the total mileage of gutters cleaned, exclusive of macadam, is thirteen miles. Snow plows were sent out shortly after 6 o'clock the morning of the

Mr. Hoover asks you to save butter, lard, suet. Mazola is a pure, vegetable oil for deep frying, sautéing, shortening—wonderfully economical.

MAZOLA

With the Nation-wide movement to save animal fats the housewife is confronted with a serious problem—if she would continue to serve fried foods. Thousands of American homes have found the answer in Mazola, the pure cooking and salad oil from corn. Because Mazola is a vegetable oil—and because a thorough test on the part of housewives has proven that Mazola is more practical, more economical than the old cooking mediums. It makes fried foods digestible—and the great big factor for economy in Mazola is that it can be used over and over again—does not transmit taste or odor from one food to another. A recent demonstration showed that the same tinful of Mazola could be used eighteen successive times for deep frying! Mazola is fine for salad dressings, too. Get Mazola from your grocer in pint, quart, half-gallon or gallon tins. The large sizes give greatest economy. Also ask for the free Mazola Book of Recipes—or write us direct.

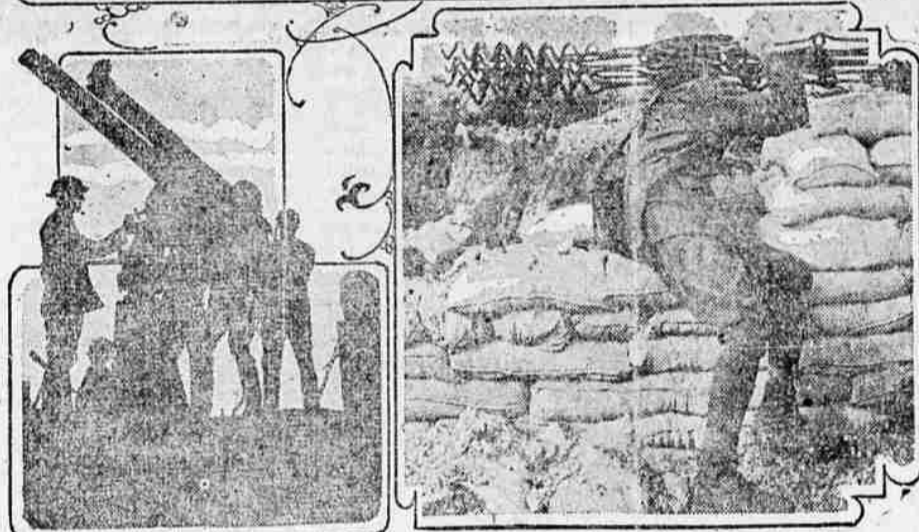

Your money refunded if Mazola does not give entire satisfaction.

ARMY OF WORKERS NEEDED ON THE FRENCH FRONT TO SUPPORT THE GALLANT MEN BEHIND THE GUNS

The recent experience of the United States engineers near Cambrai when many of them dropped shovels and spades to seize guns and fight side by side with their British allies, emphasizes the fact that an army of workers is needed constantly to supplement an army of fighters. The upper picture shows in striking silhouette a detail of sappers secured by the British and Canadian Recruiting Mission returning at night after a hard day's work consolidating gains on the French front. The lower photograph apparently doesn't show the "bone dry" district because Tommy is resting under a

load of corkscrews. These are not used for bottles, but as posts upon which to hang barbed wire for the famous barbed wire entanglements. Pounding in a post is not only hard work but noisy work as well and is not to attract the unwelcome attentions of the German snipers and machine gun "pill boxes," so Tommy laboriously but silently screws these corkscrews into the ground and then strings his barbed wire between them. The insert at the left is a striking silhouette of an anti-aircraft gun at twilight guarding the workers and the fighters from German aeroplanes. Among the men urgent-

ly wanted by the inland waterways and docks section of the Imperial Royal Engineers are blacksmiths, boat builders, carpenters, caulkers, drillers, frame benders, heavy timbermen, platers, platers' helpers, pile drivers, quarrymen, riggers, riveters and their mates, seamen, shipwrights, shipyard machinists and stevedores between the ages of 41 and 66. A sapper, who ranks as private, receives 76 cents per day, a lance corporal 84 cents, a second corporal \$1, a corporal \$1.08 and a sergeant \$1.28, and all get free transportation to the point of enlistment.

heavy snow and succeeded in plowing approximately forty miles of sidewalk, it being necessary to plow out the walk on both sides of many of the streets. Six plows were used for this. Practically all of the work was done in time for the school children to reach school over the plowed walks. It is practically impossible to reach all of the residences, but the greater part of the walks were cleared. I consider this a very great showing for the street department.

Wins First Prize.
SPOKANE, Wash., Jan. 17.—Mrs. Grace Guernsey of Pullman is the winner of the first prize offered by the Washington State College for the best war bread submitted in a competition among housewives of the state. Miss Georgia Stamp of Walla Walla won second honor and Mrs. C. Nounman of Olynah won third. Mrs. Guernsey's bread was scored highest because of its savor, its wheat without loss of palatability, digestibility or nutrition. Her recipe, sent in with her when winning wheat bread, follows:

One cup of soft yeast (the old-fashioned starter); one cup of cornmeal, the yellow preferred; one cup of oatmeal, well cooked; one cup of mashed potatoes, put through a sieve; two cups of flour, two teaspoons of salt. Mix all ingredients in a solid loaf, knead till the bubbles show in the bread dough, but where it will keep very warm, but not hot, when doubled in bulk, knead it down again; when again doubled in bulk, bake the same as loaf.
