A committee was appointed to see to a physical efficiency program to look into the physical efficiency of pupils. A discussion of the general program for the next meeting to be held at Portland was also held.

Lyman-Ross Wedding—Grant Lyman and Miss Nellie Ross were married by Justice of the Peace A. C. Williams yesterday in his office. Mr. Lyman is a well known La Grande boy, and a boiler-maker in the O-W. R. & N. shops. Miss Nellie Ross is a daughter of Mr. and Mrs. Frank Ross, Mr. Ross being a mechanic in the Smith garage. The marriage was a quiet affair, only immediate relatives being present. The young couple left for Portland on the evening train and will take up their permanent residence there. Mr. Lyman will be employed as a boiler maker for one of the large ship yards. There was a large crowd at the train to see the happy couple depart on their journey to their new home as both of them have spent most of their lives in La Grande. Mrs. Lyman, Jr., is a granddaughter of Mrs. John Scott whose husband is one of the contractors of the sorting sheds at the Palmer mill. The parents of both bride and groom are old time residents of La Grande.

Donate Field Glasses—W. R. Parker, an engineer on the O-W. R. & N., has been appointed as representative to collect field glasses, binoculars and telescopes for the army, navy and aero service. The glasses are all sent to E. K. Scott at the navy recruiting station at Portland. The U. S. government is urgently in need of every field glass or telescope it can possibly secure. These glasses were largely procured from France and Germany before the war, and it will be a year or more before this country can begin to catch up with the demand. The following patriotic La Grande residents have donated their field glasses: Mrs. M. E. Honn, a particularly fine glass; Harry Swart, Mrs. G. F. Bryant, I. D. Noah and W. R. Parker, O. E. Lemons and J. M. Burley, general foreman of the O-W. shops here who donated an especially fine field glass. The following gentlemen have donated a large high power terrestrial telescope worth many hundreds of dollars which will be of inestimable service at a look-out station: C. M. Humphreys, T. J. Serozia, Ed. Cooldice, Pat Oliver. All glasses are donated for the length of the war and will be returned by the government or paid for. All patriotic citizens are requested to donate every field or marine glass or telescope that they can possibly spare to the government to help win this war. A field glass may mean the saving of many lives.

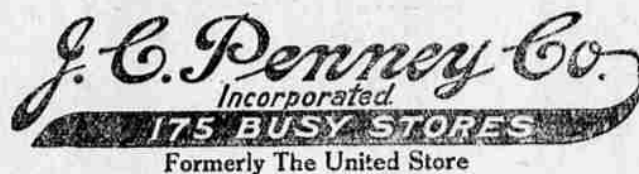

Have You Filed Your Income Tax Return?—If not out this out for future reference: Married persons with net incomes of \$2000 or more and single persons with net incomes of \$1000 or more for the calendar year 1917, must file a return before March 1, 1918. Additional exemptions claimed as head of a family or for dependent children do not excuse you from filing a return if your net income reaches the figures given above and the penalty for failure to file a return will be imposed, even though no tax is shown to be due. No return need be filed, however, unless your net income reaches \$1000 if single, or \$2000 if married. All corporations must file returns whether they have any net earnings or not. Their returns are due at the same time unless a fiscal year has been established. Blank forms for corporations have been delayed but will doubtless be ready soon. Since the time allotted to Union County, during which an income tax officer would be here to assist taxpayers, has expired, returns will now have to be filed by mail with Milton A. Miller, Collector of Internal Revenue, Portland, Oregon. If your banker or lawyer cannot furnish you with the necessary blank forms, write to the Collector for them. Everybody whose net income approaches the amounts stated should keep accurate records for the year 1918, as estimates will not be favorably considered in connection with future returns.

GENERAL WOOD WOUNDED (Continued From Page 1.) no further details. All of the division commanders have been or will be sent to Europe for brief periods. General Wood, commanding Camp Funston, Kansas, went over several weeks ago. General Wood has been one of the least prominent army officers during recent months, in spite of the fact that he outranks all the other Major-Generals in seniority and, according to many authorities, is the most able.

NEED BIG HERDS

Europe's Meat Supply Must Come From America.

Warring Nations Have Depleted Live Stock at Enormous Rate, Even Killing Dairy Cattle For Food.

American stock breeders are being asked to conserve their flocks and herds in order to meet Europe's tremendous demands for meats during the war and probably for many years afterward.

The United States food administration reports that American stock raisers have shown a disposition to co-operate with the government in increasing the nation's supply of live stock. Germany today is probably better supplied with live stock than any other European nation. When the German armies made their big advance into France and then retreated virtually all the cattle in the invaded territory—approximately 1,800,000 head—were driven behind the German lines.

But in England—where 2,400,000 acres of pasture lands have been turned into grain fields—the cattle herds are decreasing rapidly. One of the reasons apparently is the declining maximum price scale adopted by the English as follows: For September, \$17.75 per 100 pounds; October, \$17.28; November and December, \$16.08; January, \$14.40. The effect of these prices was to drive beef animals on the market as soon as possible.

In France the number of cattle as well as the quality have shown an enormous decline during the war. Where France had 14,807,000 head of cattle in 1913, she now has only 12,341,000, a decrease of 16.6 per cent. And France is today producing only one gallon of milk compared to two and one-half gallons before the war. Denmark and Holland have been

forced to sacrifice dairy herds for beef because of the lack of necessary feed.

Close study of the European meat situation has convinced the Food Administration that the future problem of America lies largely in the production of meat producing animals and dairy products rather than in the production of cereals for export when this war will have ceased.

The Music Lesson

is never tedious when the instrument played is a good one. That's why the best music teachers always recommend our 'cellos, violins, guitars, mandolins, banjos, etc. They have a tone that charms even when the dry-est exercise is played on them. Think then how sweet a beautiful melody will sound on them.

Bob Burdette On Advertising

Bob Burdette, the great lecturer, preacher and humorist, always had a keen understanding of people in the mass of what Gerald Stanley Lee would call "crowd psychology." As an instance of his ability to apply this insight to business affairs, and in this case to the business of advertising, postage, a very helpful publication devoted to direct-by-mail advertising, recently submitted the following:

"My son, there is nothing so mysteriously funny as an advertisement.

"The prime, first, last, and all the time object of an advertisement is to draw custom. It is not, was not, and never will be designed for any other human purpose.

"So the merchant waits till the busy season comes and his store is so full of customers he can't get his hat off, and then he rushes to his printer and goes in for advertising.

"When the dull season gets along and there is no trade, and he wants to sell his goods so bad he can't pay his rent, he stops his advertising. That is, some of them do; but occasionally a level headed merchant does more of it, and scoops in all the business while his neighbors are making mortgages to pay the gas bill.

"There are times when you couldn't stop people from buying everything in the store if you planted a cannon behind the door, and that's the time the advertisement is sent out on its holy mission.

"It makes light work for advertising, for chalk sign on the sidewalk could do all that was needed, and have a half holiday six days in a week; but who wants to favor an advertisement?

"They are built to do hard work, and should be sent out in the dull days when a customer has to be knocked down with hard facts and kicked insensible with bankrupt reductions and dragged in with irresistible slaughter of prices, before he will spend a cent.

"That's the aim and the end of advertising, my son; and if you ever open a store, don't try to get them to come when they are already sticking out of the window, but give them your advertisements right between the eyes in the dull season, and you will wax rich, and own a fast horse, and perhaps be able to smoke a cigar once or twice a year.

"Write this down where you will fall over it every day: 'The time to draw business is when you want business, and not when you have more than you can attend to already.'
