Heating Stoves

Winter is still with us, a lot of cold days yet to come, and still another winter; but we want to put our heating stove money in refrigerators, and we are going to make it worth your time to investigate our heating stoves. With the high price of fuel you cannot afford to burn the old stove. Real satisfaction is to use a Universal heater. Heaters will be worth 25 per cent more next fall. That would make the heater that is selling today for \$40.00 sell for \$50.00 this fall.
