

"SASSAFRAS TEA"

The Old Reliable Spring Remedy

An infusion or tea made from sassafras bark is an old-time domestic remedy for purifying the blood. It has a real value as a depurative, that is, it expels all poisons and waste matter from the system.

We have an especially fine lot of carefully selected

SASSAFRAS ROOT BARK

Try Sassafras Tea for a while as your morning beverage. Especially good for children.

RED CROSS News and Notes.

Bring all donations to the Belgian relief headquarters in the new Foley building in charge of Mrs. Roscoe Neil and Miss Etta Foley.

The Red Cross has received a shipment of gauze, so that workers are much in demand now. The appeal for gauze supplies is becoming more urgent. Please come up and help us.

Wednesday there will be an all day session—Mrs. E. M. Humphrey.

An Appeal for Relief. Your spare clothing for the suffering people of Belgium and Northern France under the occupation of the enemy.

These allies of ours behind the German lines—the rich as well as the poor—with their native stocks of raw materials long since exhausted, and no commercial imports since the first devastation of their country need—and need promptly—this relief in their destitution. The quantity of raw materials which we have been permitted to import for manufacture into clothing in these parts of Belgium and France has never been sufficient. Even the well-to-do are short of necessities; the poor are in dire need.

As the world is short of so many things it is short of clothing, or

raw materials. We cannot purchase what is needed; we must put our spare garments to the service of the world—a measure of pure economies, conservation and patriotism.

One-third of every shipment will go to the people of the north of France; down close behind the German lines; two-thirds will go to Belgium.

The Commission for Relief has the ships—you have the clothing. In these vessels carrying cargoes of grain and other foodstuffs to the Belgians and the French in the territory occupied by the Germans, there is room for all the clothing you can give. The Commission for Relief has safe conduct passes for its ships, and the absolute assurance through its own representatives in Brussels that the clothing will be delivered only to those for whom it is intended. The Germans have never at any time seized the personal apparel of individuals.

Before the exhaustion of native supplies prospective mothers were given layettes—little bundles containing all the warm clean garments and various supplies so necessary to the babies—with which to clothe and provide for the new arrivals in-

HAIR LITTLE GIRL GAVE TO HELP WIN THE WAR

This photograph shows Miss Anna Fitzia of the Chicago Grand Opera Company, and the beautiful hair which little Margaret Lawrence, aged nine, of Meridian, Miss., sacrificed to help win the war. The girl sent her hair to Miss Fitzia to sell, so she could buy war savings stamps.

to the world. Of late, these women have been turned away by the thousands from the empty storehouses of the committees, and their newborn babies are swaddled in rags. Light warm cotton flannel and other kinds of cloth are needed, from which to make these things. On your generosity alone rests the responsibility for these young lives.

Last year in Belgium one paid \$7 to have a pair of shoes resoled. The Commission for Relief was solving them with sections of discarded material stamped out to fit the various sizes; tens of thousands of pairs of these cut-soles were thus produced. We must have shoes, and we must have scrap leather with which to repair those you give, and the other shoes now being worn over here.

It is useless to send a garment which is not made of the strongest and most durable materials, as the where the need for blankets is tre-

clothes are subjected to the hardest kind of use. But this does not mean that all garments must be in perfect repair. There are upwards of a hundred thousand women in Belgium and Northern France who will do anything for a little work, and who were mobilized and trained into marvelously efficient organization for the making of new clothing—while there were still raw materials—or the repairing, ripping up and remaking of old clothing.

These women are happiest when at work, having less time to dwell upon their misery, and they look forward with dread to the day, when their material is exhausted and garments finished, they must lay down their work and await their turn to receive the next supplies.

As to bedding: In the north of France sacks stuffed with dry leaves serve as mattresses; every-

mendous; hospitals and other institutions suffer for want of sheets. Do not forget that in some places whole families sleep together to share a single blanket.

While the Red Cross is caring for the helpless, and the destitute French and Belgians behind the allied armies, the Commission for Relief is caring for the helpless and the destitute French and Belgians "in there" behind the German lines.

The cry for clothing comes from the Commission for Relief. The clothing to be sorted and packed must go to the warehouses of the Commission. From there, it goes to the docks, and thence by ship to Rotterdam.

Four or five times a month general cargo vessels will take hundreds of tons of this clothing; every week the grain ships will carry as much more.

To meet the situation, and the opportunity, the week of March 18—25 should see not less than 5000 tons of clothing collected and on its way to the Commission warehouses.

See Kirtley's ad on Page Seven today.

The Pneumonia Season
The cold, damp weather of March seems to be the most favorable for the pneumonia germ. Now is the time to be careful. Pneumonia often results from a cold. The quicker a cold is gotten rid of the less the danger. As soon as the first indications of a cold appear take Chamberlain's Cough Remedy. As to the value of this preparation, ask anyone who has used it.—Adv.

THE WALLING MILLINERY

Next Door to Silverthorn's

Mr. Grain Farmer:

Are you prepared to handle your grain in bulk? Do not wait until Spring and Summer when you are buried with work and worried with labor shortage, but build your granaries now.

You can buy the lumber and roofing paper for a first-class 1000 bushel portable granary for \$54.58 and it will last for years. Sacks for the same amount of grain will cost you \$125.00 and this would be a dead loss against this year's crop.

A granary of this size can be moved anywhere and can be filled directly from the thresher, doing away with high priced labor handling and sewing sacks.

The boys in the trenches need the sacks for sand bags for the protection of their very lives and perhaps your boy is among them.

Spend your money in your own valley by buying lumber manufactured at home. When you buy sacks part of the money goes to India.

BUILD YOUR GRANARIES NOW

Be prepared by building them before the farming season opens up. Be sure to get good lumber, well seasoned, as low grade lumber will give you trouble in a few seasons. Don't use green lumber.

Save money—keep what you spend at home—prevent loss and damage from exposure to weather—leave the sacks for our boys in the trenches; help win the war by building granaries now.

Portable granaries of this type are universally used in other sections. One trip with a good team will haul the material for one granary. For particulars as well as prices on Union County lumber for all farm purposes, see

The George Palmer Lumber Co.

Certain-teed

Roofing - Paints - Varnishes

Certain-teed means certainty of quality and guaranteed satisfaction—

the first and last object of careful buyers. Both quality and satisfaction are guaranteed by a business which has gained world leadership because of its ability to manufacture and distribute the highest quality products at fair prices.

Certain-teed Roofing & Shingles

Certain-teed is a conservation product. It is made from rags and asphalt, skillfully converted into roofing that is impervious to the elements.

Certain-teed is the most efficient type of roof for all kinds of buildings, from the modern skyscraper to the farm barn. It is light weight, weatherproof, clean, sanitary, fire-retardant. Certain-teed is not affected by fumes or gases, and cannot rust or corrode. Its first cost is moderate, laying cost low, and upkeep practically nothing. Certain-teed is guaranteed 5, 10 or 15 years, according to thickness.

Certain-teed Paints & Varnishes

Made from the best quality materials, mixed by modern machinery in scientifically correct proportions to produce the highest quality paint.

Certain-teed Paints and Varnishes are sold at cost plus a small profit. Each color is priced according to its cost. Paint makers usually charge the same for all colors, basing their prices on the cost of making the expensive colors. The Certain-teed policy puts each color on the right basis. Therefore most Certain-teed Paints cost you less than competing paints of anything like the same high quality.

Certain-teed Products Corporation
