Samson Sieve Grip

There has been an extraordinary advance in prices of Materials and Labor used in the manufacture of Farm Implements also.

There has been an increase during the same period in prices received by the farmer for his products, which has been proportionally greater than the advance in prices which he has to pay for Agricultural Implements and which has placed the Farmer in a more advantageous position in the purchase of Farm Implements than he was before the beginning of the year 1914. So why hesitate to buy what you are going to need.
