Guarding The Children's Health. HOW many children are taught to use the tooth-brush regularly—and to use it rightly? Yet a clean mouth and sound teeth will either make or ruin their good health. On it depends a large part of their physical and mental and moral well-being. It is conceded by competent authorities that diseases of childhood, such as measles, diphtheria, scarlet fever, and so-called infantile paralysis, are not nearly so apt to attack children with healthy tonsils and clean mouths. At St. Vincent's Orphanage, Boston, Mass., there had been very many cases of children's diseases. After the dentist taught these orphan children how to use the tooth-brush, and after their little mouths had been restored to health again, and kept that way, these children's diseases have been practically banished from that Boston institution. Memorial Day. Once more our sons have gone forth to battle. Once more the fight is being waged for American life, liberty and honor. This is the accepted day of homage to those who already have laid down their lives that our Nation might live. It is also a fitting time for us to pledge anew our heartiest support to those who today are facing the supreme sacrifice. Let America to the last man, woman and child stand solidly behind the boys who are keeping aloft the banner of freedom. United States National Bank

MONTANA IS 'The Land of Independence'. 25,000 new families find homes in Montana every year. 1,000,000 acres of new sod broken each year. At the present rate of increase MONTANA within FIVE years will produce more wheat than any six states in the United States. Scores of farmers from Southeastern Washington and Eastern Oregon are buying farms there every week. We are taking on an average of six to a dozen people to inspect our lands weekly—most of whom buy. Write Ray W. Logan, Agent, La Grande, Oregon. Montana Rainfall is Ample. 1916 Average 24.5 inches. Official Average for 16 years 16.5 inches. SOME OF THE WET YEARS. 1902 28. inches. 1906 22.5 inches. 1911 21.3 inches. 1916 24.5 inches. The most significant feature of this rainfall, however, is that it comes during the summer months, while the grain is actually growing. The average for the month of May being 3 inches, June 3 inches, July 2 inches and August 2 inches. Thus, the wheat which is just appearing from the ground in May, is kept constantly soaked until harvest, which comes late in August. This differs from other states, and wheat countries, which apparently have as great or greater rainfall, but receive no rain in the summer months. Crops in such localities rarely receive any rain at all after it is ready to head out. Our Montana rainfall, likewise is an approximate duplicate of the above, which is the official figures for the Lethbridge district. The amazing crops of 1917, in the vicinity of Stirling, Raymond and New Dayton, where we have extensive holdings, were produced with less than 11 inches of rain, which was, with one exception, the lowest rainfall in 16 years. Can You Do As Well In Your Home State? Mr. Farmer: Read the following thoroughly authenticated official averages of wheat yields on farms in that portion of Southern Alberta, tributary to our offices at Stirling and just across the international boundary from our principal Montana holdings, then answer the question propounded in the above headlines. Mr. Hall, of Milk River: Flax 37 bus. Wheat 76 bus. T. W. Patching of Raymond: Averaged Wheat 65 bus. Otto Welger, of Raymond: Averaged Wheat 55 bus. C. Brunsdale of Burdett bought farm for \$3,500.00, threshed 8,100 bushels No. 1 wheat at \$1.50, which brought \$13,440.00, net gain of \$9,940.00 in one year. Lara Johnson, of Barnett, 57 bushels per acre on 160 acres, grade No. 1. Mr. Hunt, of Commerce: On Summerfallow 50 bus. Disked in crop (2nd year) 35 bus. \$100.00 per acre crop in two years with one plowing. C. H. Mahood of New Dayton, from 320 acres realized 11,060 bushels wheat. The Pilling Ranch, in the Gardston District, threshed over 800 acres of wheat yielding forty bushels an acre; average weight per bushel sixty-five pounds. Yield of potatoes at Lethbridge Experimental Farm, 757 bushels per acre; Red Fife Wheat, 59 bushels per acre. Ray. W. Logan, Sales Agent. Union, Wallowa, Baker and Grant Counties. La Grande National Bank Building, LA GRANDE, OREGON.
