"Over the Top"

By An American Soldier Who Went

ARTHUR GUY EMPY
Machine Gunner Serving in France

(Copyright, 1917, by Arthur Guy Empey)
SYNOPSIS:

CHAPTER I—Fired by the news of the sinking of the Lusitania, by a German submarine, Arthur Guy Empey, an American, leaves his office in Jersey City and goes to England where he enlists in the British army.

CHAPTER II—After a period of training, Empey volunteers for immediate service and soon finds himself in rest billets "somewhere in France," where he first makes the acquaintance of the ever-present "bookies."

CHAPTER III—Empey attends his first church services at the front while a German Fokker circles over the congregation.

CHAPTER IV—Empey's command goes into the front-line trenches and is under fire for the first time.

CHAPTER V—Empey learns to adopt the motto of the British Tommy, "If you are going to get it, you'll get it, so never worry."

CHAPTER VI—Back in rest billets, Empey has his first experience as a mess orderly.

CHAPTER VII—Empey learns how the British soldiers are fed.

CHAPTER VIII—Back in the front-line trench, Empey sees his first friend of the trenches "go West."

CHAPTER IX—Empey makes his first visit to a dugout in "Suicide Ditch."

CHAPTER X—Empey learns what constitutes a "day's work" in the front-line trench.

CHAPTER XI—Empey goes "over the top" for the first time in a charge on the German trenches and is wounded by a bayonet thrust.

CHAPTER XII—Empey joins the "knuckle club" as the bombing squad is called.

CHAPTER XIII—Each Tommy gets an official bath.

CHAPTER XIV—Empey helps die an advanced trench under German fire.

CHAPTER XV—On "listening post" in No Man's Land.

CHAPTER XVI—Two artillerymen "put me over" on Old Pepper, their regimental commander.

CHAPTER XVII—Empey has narrow escape while on patrol duty in No Man's Land.

CHAPTER XVIII—Back in rest billets Empey writes and stages a farce comedy.

CHAPTER XIX—Soldiers have many ways to amuse themselves while "on their own."

CHAPTER XX—Empey volunteers for machine gun service and goes back into the front-line trenches.

CHAPTER XXI—Empey again goes "over the top" in a charge which cost his company it killed and it wounded.

CHAPTER XXII—Strike with a machine gun silencer due to defective parts.

CHAPTER XXIII—German attack, preceded by gas wave, is repulsed.

CHAPTER XXIV—Empey is forced to take part in an execution as a member of the firing squad.

CHAPTER XXV—British prepare for the Big Push—the battle of the Somme.

CHAPTER XXVI—In a trench raid, preceding the Big Push, Empey is desperately wounded and lies unconscious in No Man's Land for 72 hours.

CHAPTER XXVII—After four months in a British hospital, Empey is discharged as "physically unfit for further war service."

CHAPTER XXVI.

All Quiet (?) on the Western Front.

At brigade headquarters I happened to overhear a conversation between our G. O. C. (general officer commanding) and the divisional commander. From this conversation I learned that we were to bombard the German lines for eight days, and on the first of July the "big push" was to commence.

In a few days orders were issued to that effect, and it was common property all along the line.

On the afternoon of the eighth day of our "strafing," Atwell and I were sitting in the front-line trench smoking fags and making out our reports of the previous night's work of the trenches, which we had to turn in to headquarters the following day, when an order was passed down the trench that Old Pepper requested twenty volunteers to go over on a trench raid that night to try and get a few German prisoners for information purposes. I immediately volunteered for this job, and shook

hands with Atwell, and went to the rear to give my name to the officers in charge of the raiding party.

I was accepted, worse luck.

At 9:45 that night we reported to the brigade headquarters dugout to receive instructions from Old Pepper.

After reaching this dugout we lined up in a semicircle around him, and he addressed us as follows:

"All I want you boys to do is to go over to the German lines tonight, surprise them, secure a couple of prisoners, and return immediately. Our artillery has bombarded that section of the line for two days and personally I believe that that part of the German trench is unoccupied, so just get a couple of prisoners and return as quickly as possible."

The sergeant on my right, in an undertone, whispered to me:

"Say, Yank, how are we going to get a couple of prisoners if the old fool thinks 'personally that that part of the trench is unoccupied'—sounds kind of fishy, doesn't it mate?"

I had a funny sinking sensation in my stomach, and my tin hat felt as if it weighed about a ton and my enthusiasm was melting away. Old Pepper must have heard the sergeant speak because he turned in his direction and in a thundering voice asked:

"What did you say?"

The sergeant with a scarlet look on his face and his knees trembling, smartly saluted and answered:

"Nothing, sir."

Old Pepper said:

"Well, don't say it so loudly the next time."

Then Old Pepper continued:

"In this section of the German trenches there are two or three machine guns which our artillery, in the last two or three days, has been unable to tap. These guns command the sector where two of our communication trenches join the front line, and as the brigade is to go over the top tomorrow morning I want to capture two or three men from these guns' crews, and from them I may be able to obtain valuable information as to the exact location of the guns, and our artillery will therefore be able to demolish them before the attack, and thus prevent our losing a lot of men while using these communication trenches to bring up re-enforcements."

These were the instructions he gave us.

"Take off your identification disks, strip your uniforms of all numerals, insignia, etc., leave your papers with your captains, because I don't want the Boches to know what regiments are against them as this would be valuable information to them in our attack tomorrow and I don't want any of you to be taken alive. What I want is two prisoners and if I get them I have a way which will make them divulge all necessary information as to their guns. You have your choice of two weapons—you may carry your 'persuaders' or your knuckle knives, and each man will arm himself with four Mills bombs, these to be used only in case of emergency."

A persuader is Tommy's nickname for a club carried by the bombers. It is about two feet long, thin at one end and very thick at the other. The thick end is studded with sharp steel spikes, while through the center of the club there is a nine-inch lead bar, to give it weight and balance. When you get a prisoner all you have to do is just stick this club up in front of him, and believe me, the prisoner's patriotism for "Deutschland ueber Alles" fades away and he very willingly obeys the orders of his captor. If, however, the prisoner gets high-toned and refuses to follow you, simply "persuade" him by first removing his tin hat, and then—well, the use of the lead weight in the persuader is demonstrated, and Tommy looks for another prisoner.

The knuckle knife is a dagger affair, the blade of which is about eight

inches long with a heavy steel guard over the grip. This guard is studded with steel projections. At night in a trench, which is only about three to four feet wide, it makes a very handy weapon. One punch in the face generally shatters a man's jaw and you can get him with the knife as he goes down.

Then we had what we called our "somesonags." These are strands of barbed wire about three feet long, made into a noose at one end; at the other end, the barbs are cut off and Tommy slips his wrist through a loop to get a good grip on the wire. If the prisoner wants to argue the point, why just place the large loop around his neck and no matter if Tommy wishes to return to his trenches at the walk, trot, or gallop, Fritz is perfectly agreeable to maintain Tommy's rate of speed.

We were ordered to black our faces and hands. For this reason, at night, the English and Germans use what they call star shells, a sort of rocket affair. They are fired from a large pistol about twenty inches long, which is held over the sandbag parapet of the trench, and discharged into the air. These star shells attain a height of about sixty feet, and a range of from fifty to seventy-five yards. When they hit the ground they explode, throwing out a strong incandescent light which lights up the ground in a circle of a radius of between ten to fifteen yards. They also have a parachute star shell which, after reaching a height of about sixty feet, explodes. A parachute unfolds and slowly floats to the ground, lighting up a large circle in No Man's Land. The official name of the star shell is a "Very-light." Very-lights are used to prevent night surprise attacks on the trenches. If a star shell falls in front of you, or between you and the German lines, you are safe from detection, as the enemy cannot see you through the bright curtain of light. But if it falls behind you and, as Tommy says, "you get in the star shell zone," then the fun begins; you have to lie flat on your stomach and remain absolutely motionless until the light of the shell dies out. This takes anywhere from forty to seventy seconds. If you haven't time to fall to the ground you must remain absolutely still in whatever position you were in when the light exploded; it is advisable not to breathe, as Fritz has an eye like an eagle when he thinks you are knocking at his door. When a star shell is burning in Tommy's rear he can hold his breath for a week.

You blacken your face and hands so that the light from the star shells will not reflect on your pale face. In a trench raid there is quite sufficient reason for your face to be pale. If you don't believe me, try it just once.

Then another reason for blackening your face and hands is that, after you have entered the German trench at night, "white face" means Germans, "black face" English. Coming around a traverse you see a white face in front of you. With a prayer and wishing Fritz "the best of luck," you introduce him to your "persuader" or knuckle knife.

A little later we arrived at the communication trench named Whisky street, which led to the fire trench at the point we were to go over the top and out in front.

In our rear were four stretcher bearers and a corporal of the R. A. M. C., carrying a pouch containing medicines and first-aid appliances. Kind of a grim reminder to us that our expedition was not going to be exactly a picnic. The order of things was reversed. In civilian life the doctors generally come first, with the undertakers tagging in the rear and then the insurance man, but in our case, the undertakers were leading, with the doctors trailing behind, minus the insurance adjuster.

The presence of the R. A. M. C. men did not seem to disturb the raiders, because many a joke made in an undertone, was passed along the winding column, as to who would be first to take a ride on one of the stretchers. This was generally followed by a wish that, if you were to be the one, the wound would be a "cushy Blighty one."

The stretcher bearers, no doubt, hoping that, if they did have to carry anyone to the rear, he would be small and light. Perhaps they looked at me when wishing, because I could feel an uncomfortable, boring sensation between my scabbard blades. They got their wish all right.

Going up this trench, about every sixty yards or so we would pass a lonely sentry, who in a whisper would wish us "the best o' luck, mates." We would blind at him under our breaths; that Jonah phrase to us sounded very ominous.

Without any casualties the mistral troop arrived at Suicide ditch, the front-line trench. Previously, a wiring party of the Royal Engineers had cut a lane through our barbed wire to enable us to get out into No Man's Land.

Crawling through this lane, our party of twenty took up an extended-order formation about one yard apart. We had a tap code arranged for our movements while in No Man's Land, because for various reasons it is not safe to carry on a heated conversation a few yards in front of Fritz' lines. The officer was on the right of the line, while I was on the extreme left. Two taps from the right would be passed down the line until I received them, then I would send back one tap. The officer, in receiving this one tap, would know that his order had gone down the whole line, had been understood, and that the party was ready to obey the two-tap signal. Two taps meant that we were to crawl forward slowly—and believe me, very slowly—for five yards, and then halt to await further instructions. Three taps meant, when you arrived within striking distance of the German trench, rush it and inflict as many casualties as possible, secure a couple of prisoners, and then back to your own lines with the speed of light. Four taps meant, "I have gotten you into a position from which it is impossible for me to extricate you, so you are on your own."

After getting Tommy into a mess on the western front he is generally told that he is "on his own." This means, "Save your skin in any way possible." Tommy loves to be "on his own" behind the lines, but not during a trench raid.

The star shells from the German lines were falling in front of us, therefore we were safe. After about twenty minutes we entered the star shell zone. A star shell from the German lines fell about five yards in the rear and to the right of us; we hugged the ground and held our breath until it burned out. The smoke from the star shell traveled along the ground and crossed over the middle of our line. Some Tommy sneezed. The smoke had gotten up his nose. We crouched on the ground, cursing the offender under our breath, and waited the volley that generally ensues when the Germans have heard a noise in No Man's Land. Nothing happened. We received two taps and crawled forward slowly for five yards; no doubt the officer believed what Old Pepper had said, "Personally I believe that that part of the German trench is unoccupied." By being careful and remaining motionless when the star shells fell behind us, we reached the German barbed wire without mishap. Then the fun began. I was scared stiff as it is ticklish work cutting your way through wire when about thirty feet in front of you there is a line of Boches looking out into No Man's Land with their rifles lying across the parapet, straining every sense to see or hear what is going on in No Man's Land; because at night, Fritz never knows when a bomb with his name and number on it will come hurtling through the air aimed in the direction of Berlin. The man on the right, one man in the center and myself on the extreme left were equipped with wire cutters. These are insulated with soft rubber not because the German wires are charged with electricity, but to prevent the cutters rubbing against the barbed wire stakes, which are of iron, and making a noise which may warn the inmates of the trench that someone is getting fresh in their front yard. There is only one way to cut a barbed wire without noise and through costly experience Tommy has become an expert in doing this. You must grasp the wire about two inches from the stake in your right hand and cut between the stake and your hand.

If you cut a wire improperly, a loud twang will ring out on the night air like the snapping of a banjo string. Perhaps this noise can be heard only for fifty or seventy-five yards, but in Tommy's mind it makes a loud noise in Berlin.

We had cut a lane about halfway through the wire when, down the center of our line, twang! went an improperly cut wire. We crouched down,

Receiving First Aid.

cursing under our breath, trembling all over, our knees lacerated from the strands of the cut barbed wire on the ground, waiting for a challenge and the inevitable volley of rifle fire. Nothing happened. I suppose the fellow who cut the barbed wire improperly was the one who had sneezed about half an hour previously. What we wished him would never make his new year a happy one.

The officer, in my opinion, at the noise of the wire should have given the four-tap signal, which meant, "On your own, get back to your trenches as quickly as possible," but again he must have relied on the spiel that Old Pepper had given us in the dugout, "Personally I believe that that part of the German trench is unoccupied." Anyway, we got careless, but not so careless that we sang patriotic songs or made any unnecessary noise.

During the intervals of falling star shells we carried on with our wire cutting until at last we succeeded in getting through the German barbed wire. At this point we were only ten feet from the German trenches. If we were discovered, we were like rats in a trap. Our way was cut off unless we ran along the wire to the narrow lane we had cut through. With our hearts in our mouths we waited for the three-tap signal to rush the German trench. Three taps had gotten about halfway down the line when suddenly about ten to twenty German star shells were fired all along the trench and landed in the barbed wire in rear of us, turning night into day and silencing us against the wall of light made by the flares. In the glaring light we were encircled by the following unpleasant scene.

All along the German trench, at about three-foot intervals, stood a big Russian guardman with his rifle at the side, and then we found out why we had not been challenged when the man sneezed and the barbed wire had

been cut properly. The Russian guardman in front of the trench had sneezed and a single fence of barbed wire and we knew our chances were one thousand to one of returning alive. We could not rush their trench on account of this second defense. Then in front of me the challenge, "Halt," given in English rang out, and one of the finest things I have ever heard on the western front took place.

From the middle of our line some Tommy answered the challenge with, "Aw, go to h—l." It must have been the man who had sneezed or who had improperly cut the barbed wire; he wanted to show Fritz that he could die game. Then came the volley. Machine guns were turned loose and several bombs were thrown in our rear. The Boche in front of me was looking down his sight. This fellow might have, under ordinary circumstances, been handsome, but when I viewed him from the front of his rifle he had the goblins of childhood imagination relegated to the shade.

Then came a flash in front of me, the flare of his rifle—and my head seemed to burst. A bullet had hit me on the left side of my face about half an inch from my eye, smashing the cheek bone. I put my hand to my face and fell forward, biting the ground and kicking my feet. I thought I was dying, but, do you know, my past life did not unfold before me the way it does in novels.

The blood was streaming down my tunic, and the pain was awful. When I came to I said to myself, "Emp, old boy, you belong in Jersey City, and you'd better get back there as quickly as possible."

The bullets were cracking overhead. I crawled a few feet back to the German barbed wire, and in a stooping position, guiding myself by the wire, I went down the line looking for the lane we had cut through. Before reaching this lane I came to a limp form which seemed like a bag of oats hanging over the wire. In the dim light I could see that its hands were blackened, and knew it was the body of one of my mates. I put my hand on his head, the top of which had been blown off by a bomb. My fingers sank into the hole. I pulled my hand back full of blood and brains, then I went crazy with fear and horror and rushed along the wire until I came to our lane. I had just turned down this lane when something inside of me seemed to say, "Look around." I did so; a bullet caught me on the left shoulder. It did not hurt much, just felt as if someone had punched me in the back, and then my left side went numb. My arm was dangling like a rag. I fell forward in a sitting position. But all the fear had left me and I was consumed with rage and cursed the German trenches. With my right hand I felt in my tunic for my first-aid or shell dressing. In feeling over my tunic my hand came in contact with one of the bombs which I carried. Gripping it, I pulled the pin out with my teeth and blindly threw it towards the German trench. I must have been out of my head, because I was only ten feet from the trench and took a chance of being mangled. If the bomb had failed to go into the trench I would have been blown to bits by the explosion of my own bomb.

By the flare of the explosion of the bomb, which luckily landed in their trench, I saw one big Boche throw up his arms and fall backwards, while his rifle flew into the air. Another one wilted and fell forward across the sandbags—then blackness.

Realizing what a foolhardy and risky thing I had done, I was again seized with a horrible fear. I dragged myself to my feet and ran nimbly down the lane through the barbed wire, stumbling over cut wires, tearing my uniform, and lacerating my hands and legs. Just as I was about to reach No Man's Land again, that same voice seemed to say, "Turn around." I did so, when, "crack," another bullet caught me, this time in the left shoulder about one-half inch away from the other wound. Then it was traps for me. The lights went out.

When I came to I was crouching in a hole in No Man's Land. This shell hole was about three feet deep, so that it brought my head a few inches below the level of the ground. How I reached this hole I will never know. German "typewriters" were "traversing" back and forth in No Man's Land, the bullets hitting the edge of my shell hole and throwing dirt all over me.

Overhead shrapnel was bursting. I could hear the fragments slap the ground. Then I went out once more.
