Social and Personal

R. M. Wade is here from Los-tine.

Mrs. Peto Deiver was a passenger for Kamela this morning.

Mrs. Jessie D. McComb is a Corvallis visitor in La Grande.

Eugene F. Hug is among the Elgin visitors in La Grande today.

James Johns was among the arrivals from Pendleton on No. 6 today.

Mrs. O. L. Liebe, W. H. Eccles and B. F. Ellis, are in the city from Baker.

John Brant, a farmer of the North Powder section, is a business visitor in La Grande.

S. P. Atherton, who is a candidate for governor, of Idaho, is in the city from Twin Falls.

W. W. Pogue, Mrs. E. E. Holt, W. E. Luffel and M. J. Shanafelt, of Joseph, are in the city.

C. N. Lewis, postmaster and express agent at Hillgard, is a business visitor in La Grande today.

Mr. and Mrs. Frank Toney, of Baker, are here on a visit with Mrs. Toney's parents, Mr. and Mrs. W. W. McKinzie.

Joe Kelly, the retiring barber shop proprietor, went to Kamela this morning to enjoy a few days rest among the pines.

Mrs. Watkins, who has been visiting her daughter-in-law, Mrs. Alice Hill Watkins, left today on her return to her home in Bandon.

P. M. Winam was a passenger on No. 17 this morning on route to his home in Walla Walla after a visit to the Hector McDonald ranch at Wallawa.

Mrs. Fanny Krebit was a returning passenger to her home in Pendleton this morning after a visit with her mother, Mrs. J. M. Bull, in La Grande.

"Pat" Foley, accompanied by Norman Deslet, left this noon by auto, for the Eugene Officers' Training Camp, where they will join Major Coolidge, who is already there.

Mrs. F. G. Schilke has returned from a trip to Seattle and Bellingham. She was accompanied home-ward by her daughter, Frederika, who has been visiting her uncle and aunt, Mr. and Mrs. Walker, at Bellingham.

J. L. Sherman, wife and children, yesterday returned from Los Angeles, California, where they spent a vacation of two weeks. Mr. Sherman is connected with the O. W. R. & N. superintendent's office in La Grande.

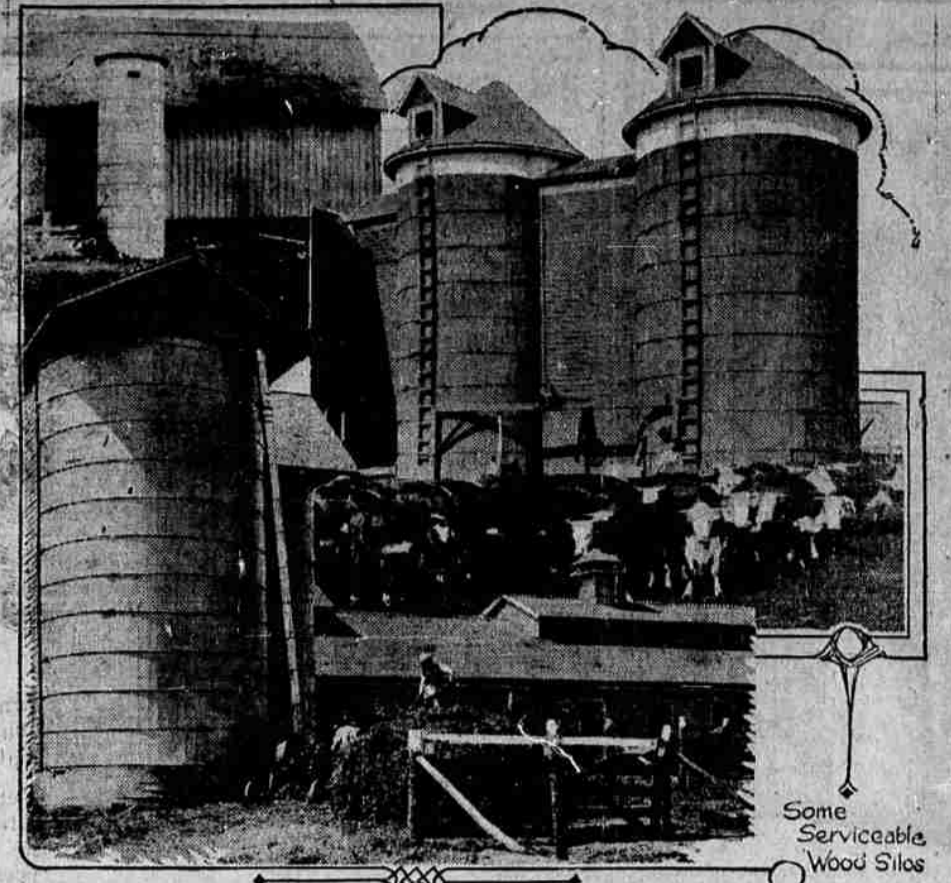

Mr. and Mrs. John Mars, Jr. and daughter, Bernice, are in La Grande, from Sweetgrass, Montana, to visit relatives for a brief period and also to give Mr. Mars the opportunity to look over the scenes of his boyhood. They are traveling by auto and will continue the journey through eastern and southern parts of Oregon. Mr. Mars is the proprietor of a big general merchandising establishment in his home town in Montana.

MRS IRA NELSON MORRIS

Mrs. Ira Nelson Morris of Chicago, wife of the American minister to Sweden, has been taking a rest in the United States.

SILO CONSTRUCTION URGED AS MEANS FOR CONSERVING FOOD FOR ANIMALS.

Some Serviceable Wood Silos

As part of the nation-wide campaign in the interest of maximum food production and utilization, government and private agencies have inaugurated a movement to make the present summer the greatest silo-building period in the history of the country. Scarcely a farm experiment station in the land is not actively co-operating in this work. Thousands of farmers have long recognized the advantage of being able, with silos, to keep cattle in the best condition throughout the winter months by feeding them green feed. Other thousands who have not fully appreciated the silo heretofore are expected to be reached as a result of the educational efforts now being put forth.

The Best Kind of Silo.
 With increased attention attracted to the silo, the question is arising in the minds of many as to what is the best material to be used in this form of construction. Various kinds of silos are being exploited in the advertising columns of the newspapers and farm journals.

It appears, however, that, based on the opinion and experience of many authorities, wood makes the silo of greatest durability and best general service. Aside from the fact that the cost of lumber is less than for any other building material, the expense of erecting a wooden silo is less, as the farmer can do the work himself, with the help of ordinary farm labor. The oldest silos in existence, still in use, are of wood. In point of proved efficiency, the wood silo occupies an absolutely impregnable position. The farmer with years of silo experience is certainly the judge whose opinion can be depended on. That the wood silo is the farmers' choice, was strikingly evidenced as the result of an actual count made in the state of Kansas, which showed that Kansas had 5,715 silos, and of that total 5,155 were wood—in other words, there were nearly ten times as many silos of wood as there were of all other materials together.

The Wood to Use.
 These qualities found in Southern Pine make it supreme as the material for silo construction—breaking strength, crushing strength, stiffness and toughness, combined with great durability. The last quality is due to its fine, even, compact grain and the fact that it contains a quantity of pitch and resin, natural repellants of moisture and decay.

There are almost as many available testimonials endorsing Southern Pine silos as there are testifying to the superiority of wood silos.

An illustrated booklet for farmers, "How to Choose and How to Use a Silo," is offered by the Southern Pine Association of New Orleans, for free distribution, as the contribution of the Association to the national silo-building campaign.

PLAN ADVERTISING CAMPAIGN

To Tell Public Truth About Candy Situation.

The candy makers of Oregon are planning to tell the general public the facts about the candy industry and about candy as a food product.

Due to much misunderstanding, and to a lack of a definite knowledge of the facts, the candy industry has been brought to the verge of collapse.

Ask the average man or woman how much sugar goes into the making of candy and you will find that it is the general opinion that all the way from 25 to 50 per cent goes into candy making.

This has led many people to believe that if the candy factories were still further restricted or possibly entirely put out of business, the sugar shortage problem would be solved.

But this is not correct.

Far from using 25 to 50 per cent the candy industry uses something less than 8 per cent of the sugar used in this country.

Even if the entire amount were cut off from candy-making, the sugar situation would not be greatly relieved.

The candy makers contend that all should share alike in the saving of sugar. They have already given until it hurts. There is no more patriotic body of men than the men in the candy business and they have gladly given up their supplies, but they now feel that the interests of the country call for a definite knowledge of the facts. People must realize that the candy industry alone cannot save enough sugar to solve the problem. Many people, without knowing the facts, have felt that candy could be curtailed and the problem solved. But facts show that the place to save sugar where it really counts is in the home, from now on. Figures show that out of the 84 pounds normally used by each person in the United States in one year, less than 7 pounds are used in candy, while 60 pounds are used in the home on the table. The saving of ten per cent in the home is nearly equal to the saving of 100 per cent in the candy industry. Candy makers believe that a fair-minded public, with these facts in mind, will be willing to help share the strain to the end that the big industry built up through many years can survive and go through without further curtailment as the curtailment is now coming to the point where the future of the industry is looked to with fear.

It is believed by the candy makers that as the general public comes to learn of the high food value of candy and also realizes the lengths to which the industry has already gone that relief will not be withheld.

The series of advertisements is the method of expression selected by the candy makers as a means to enable them to get the full facts before the public.

MARRIED IN PORTLAND.

Nuptials For Miss Ethel Hanley And Fred Henning Performed

Word has been received of the marriage in Portland of Miss Ethel Pauline Hanley and Fred G. Henning, both of La Grande.

The wedding took place Saturday, July 27, 1918, and the ceremony was performed by Dr. Boyd, Presbyterian pastor in Portland.

Miss Hanley, who is among the well-known and popular young ladies of this community, is the daughter of Mrs. Kate Hanley and the groom is at present a student in the Benson Polytechnic school. A shower of congratulations will go to the newly-wedded pair.

Writer's Cramp.

Writer's cramp is a disease to which those who do much writing are liable toward middle age, and a person afflicted with it has no complete control over the muscles of the thumb, middle and forefinger. The typewriter has proved the best resource of those who suffer from the ailment.

New Trained Muscles.

The capacity to exert will power, to make firm resolutions, to decide and to judge propositions accurately on their merits calls for well-cultivated and trained muscles. A flabby-muscle man is apt to be a weak-willed one.—Dr. Leonard Hirschberg.

Armament of the Monitor.

The armament of the Monitor, which defeated the Merrimac, consisted of two eleven-inch guns, throwing 180-pound shot.

Mrs. W. T. Cross leaves tomorrow for her home in Portland. She has been here during the illness of her son, Ed.

Mrs. T. G. Gibson is here from Pilot Rock visiting Mr. and Mrs. Ed. Cross.

Sailors, value \$3.50 and \$5.00, reduced to 75c. The Toggery. 7-29-31

Observer advertising will bring results.

A Fight for Life

It has been said to die for many of us in the past and the lucky people are those who have suffered, but who are now well because they heeded nature's warning signal in time to correct their trouble with that wonderful new discovery of Dr. Pierce's, called "Annie-rie." You should promptly heed these warnings, some of which are dizzy spells, backache, irregularity of the urine or the painful twinges of rheumatism, sciatica or lumbago. To-day may make possible the dangerous forms of kidney disease, such as Bright's disease, diabetes or stone in the bladder.

To overcome these distressing conditions take plenty of exercise—in the open air, avoid a heavy meat diet, drink freely of water and of each meal, take Doctor Pierce's Annie-rie Tablets (double strength). You will, in a short time, find that you are one of the firm indosers of Annie-rie, as are thousands of neighbors.

Mr. A. V. CEMM says: "I suffered greatly with my back and kidneys. I called in doctors and they did me no good, but recommended an operation. I saw Annie-rie for kidneys and backache advertised so sent up to the drug store and got a package, and it cured me. This was one year ago. I was down in bed and had taken many different kinds of medicines but obtained no relief from them."

Mrs. ROSA MELAYE, of GETCHELL, WASH., says: "I was troubled with the backache for the last five years. I sent for a package of Dr. Pierce's Annie-rie Tablets, which cured me completely. I will recommend Annie-rie to all my friends who are troubled with backache."

Step into the drug store and ask for Annie-rie, or send Dr. V. M. Pierce, Buffalo, N. Y., for 12-1-1918. Annie-rie—many times more powerful than other medicines and acts as hot water on the system.

Koveralls for the Kiddies

This is just a little tip to you, Mrs. Thrifty Buyer: The manufacturer of the genuine KOVERALL announces a readjustment of prices in the near future—this means an advance in the wholesale cost, above the present selling price. Take advantage of the prices NOW.

Genuine Levi-Straus Koveralls, extra heavy denim and khaki cloth; price now **\$1.25 per garment** All sizes, 2 to 8 years, cut big and full, well sewed, khaki cloth, blue and red denims; priced now

Man in the Making.
 We are all sculptors of life. From the anthropoid ape stage clear up through the ages, in the slow process of evolution, man has been at work chiseling himself. Always on the whole bettering himself a little, eliminating the animal, the brute qualities more and more, in spite of setbacks, he has persistently struggled toward the realization of his ideals—the higher man, the ideal man.

Our sculpturing is mental; our thought is the chisel that traces the ideal in life's marble. Angel and demon, beauty and ugliness, success and failure lie side by side in the marble of life.—Dr. Orison Swett Marden, in New Success.

Teeth to Blame.
 The worst criminals seem to be the teeth. The Paris Medical takes a new fling at them, blaming them for sins usually charged to wronged, misjudged tuberculosis. "Baudé insists that with enlarged glands in the neck, the primary lesion should be sought in the teeth, before incriminating the tubercle bacilli, and urges that the physician should insist on the teeth being put in order as an indispensable element of whatever treatment he is instituting."

Ornamental Trees.
 An ornamental tree the Japanese and Chinese persimmons are entitled to high rank. When the trees are full leaf they are handsome without other adornment. The trees load with orange and orange-red fruits among the most striking objects in the garden. All thrive in California and not elsewhere except in southern states.

Job Printing, The Observer, Main 37

"Nuts" of Prisrend.
 Prisrend makes remarkably modest demands on orthography for a Balkan town, being spelled in only six different ways.

It has no need for a water board because the river Britza, called the Maritza by casual geographers, cuts the town in two, while in almost all the streets there are brooks that become torrents after heavy rains.

The Prisrendian "nuts" are the most gaudily dressed people in the Balkans and the local bazaars blaze with garish garments, beside which the rain-bow-hued neckties inflicted on innocent Englishmen at Christmas would look drab.—London Chronicle.

Uppbuds Chinese Army.
 Ken Wang, twelfth graduate in the 1019 class at West Point academy, 7 year ahead of time, announced that he will return to China to take part in the rebuilding of its new army.

Ken Wang was selected to come to America to be educated in the best military academy in the world expressly for the part he is to play in bringing military coherence into Chinese army affairs.
