LA GRANDE PROMOTES GRANITE PROJECT.

The granite from the extensive deposits on the south fork, above Lostine, will be put on the market at once for monument work by John M. Newell of La Grande says the Enterprise Chief. He was in the county last week making arrangements for the location of a shop at Lostine to cut up the stone. The marble will be taken from the Pole bridge, five miles from town, will be hauled to the shop in large blocks and cut into smaller pieces for shipment out by the railroad.

The marble is in the national forest, and Mr. Newell has made arrangements for getting it out. In May he shipped out a carload which was handled with entire success, showing the market for the product.

Granite for monuments formerly was brought from Barre, Vt. The old cost was \$2.50 to \$3 a cubic foot, but this has been advanced to about \$14, a price which is prohibitive. So Mr. Newell concluded to try the Wallawa county product.

Goodman brothers are unable to continue the fine dairy business they have just not well started, and will sell off their 32 cows at private sale beginning today. Clayton Goodman is preparing to enter the service of the country, and Ralph Goodman has been suffering from rheumatism which makes it impossible for him to work. They have an ideal summer pasture for their cows in the mountains on the south fork.

August 10th, last day to pay water rent without penalty. 8-8-2t.

PRaise IS HEARD FOR UNION COUNTY.

(Continued from page two)

Multnomah Guard and adjutant of the Military Police of Oregon, likewise found some of his message made nil by what he had seen on the parade ground just a few minutes before, in receiving military courtesies extended him and his colleagues by the two companies of the Fourth Separate Battalion.

The major spoke of the Military Police, predicting for it permanency in Oregon, and asking for moral support from the public, setting forth many of the reasons why it should thrive—because the need for it is so manifest.

Oregon Guards Explained. He then proceeded to explain the Oregon Guard, such as exists in La Grande, and in so doing, paid a high compliment to the institution here, saying that he has seen practically all such institutions in the state and he declared emphatically, that none were better. He pronounced them akin to veterans.

Pleads For Enlistments. "Every man of draft age is neglecting a moral and patriotic duty if he does not belong to the Home Guard," he said. "Men up to 60 and 70 should belong—boys should belong—men of draft age should belong—for it not only keeps the morale of the community up at home, but the draftees learn something about the

game that is soon to be theirs." He proceeded at length to plead for quick enlistments from all walks of life for, the local guard which has sent nearly 75 men into service within a year.

Doctor-Captain Heard. Then came Captain Russell, detailed from Camp Lewis to bring a message to the draftees. And a message it was. Before the ladies had been asked to retire, he dwelt for a few minutes upon the extreme caution exercised by the government in making the soldiers keep clean, how it required Mr. Soldier to take frequent baths, to keep teeth clean, hair brushed, to be clean shaved, and of the many other ways Uncle Sam prevents disease and suffering by making the men take care of themselves.

He spoke of the infection diseases classified as respiratory, intestinal, etc. He pointed out how the government, through inoculation, has now stamped out smallpox, typhoid and other dreaded diseases, and pointed out how the army is free from infection.

Then the audience was changed in complexion, the ladies left, and the speaker got down to brass tacks with the men and told them—the registrants particularly—just exactly where they stood, and what would happen to them if they came to camp infected. He told them what would happen to innocent women in the future from these dreaded diseases—in fact he brought the audience to keen alertness, and when he was through, the horror of it all and the need for a clean body had been so manifested that there is no question of doubt but that the seed he planted will grow and

bear fruit and help to make Union county a cleaner community, even than it now is, and it is cleaner than some of its neighboring counties even now, the government records show.

He told how the government is fighting the cancer from both ends, in that it goes out to find the women who spread the disease and interns them in Portland and elsewhere.

INSURANCE MAN TELLS OF FRIEND'S RECOVERY

"He suffered considerably from gas in stomach and colic attacks, and at times was very yellow. His doctors diagnosed his ailment as gall bladder trouble and that an operation was necessary. Some one persuaded him to try May's Wonderful Remedy. Since taking it one year ago he tells me he has been able to eat anything." It is a simple, harmless preparation that removes the catharral mucus from the intestinal tract and allays the inflammation which causes practically all stomach, liver and intestinal ailments, including appendicitis. One dose will convince or money refunded. For sale by druggist everywhere. 8-9-1t ad.

SHERRY'S

While American boys are marching away to war today, another page in recent American history is recalled in the Theda Bara super-production, "Under the Yoke," which is now being shown as the stellar attraction at the Sherry theatre for the last time today.

In the smashing photodrama, in which the famous William Fox star gives a thrilling portrayal of the part of a Spanish girl in love with a dashing American Army officer, there are embodied some of the fiercest struggles which took place in the jungles of the Philippines between the insurgents and the American fighting men who brought the islands of the Pacific under the flag of Uncle Sam.

EMPLOYEE BURNED IN FIRE.

PENDELTON, Aug. 8.—A combine field on the Jim Hill ranch three miles north of town was totally destroyed last night at 9 o'clock when the machine caught fire from the heat of the motor while the crew was pumping distillate. Burrell Anderson, employed on the separator, is at St. Anthony's hospital today with two burned hands and is suffering from exhaustion as

the result of attempting to put out the fire.

Further damage by the fire was prevented by quick work of the crew who hooked a caterpillar engine to the combine and dragged it from the field. The ground around the machine was cleared to prevent the spread of the fire.

The members of the Oregon Military Police were present who did in the work. Captain H. E. Williams praised the work of the Boy Scouts who were "on the job" as fire-fighters.

SCIENTISTS STUDY JOURNALISM.

Stories Should Have a "Kick," O. A. C. Professor Told Entomologists. CORVALLIS, Aug. 8.—That newspaper publicity is an effective means of conveying information to the farmers which will assist in the combatting of insect pests, but that entomologists should take a course in journalism in order to "get by" the editors with their copy, was the belief expressed by A. L. Lovett, entomologist in the Oregon Agricultural College in an address before entomologists of the Northwest, now in conference at the College.

Circulars are effective only when they are brief and right to the point, in the opinion of Professor Lovett. Posters and placards are used a great deal. The average poster is not read, however, he thinks. Too much fine print is used

The Acme of Tractor Efficiency

This is just to remind you that you are expected to raise as much wheat next year as you do this year, or more, if possible. THE RELIABLE LIGHT TRACTOR is the solution in Britain—why not here? It takes one-fourth of the acreage a horse can farm to feed himself, which would (if put into pork) feed at least four soldiers. Then, why starve our boys over there for the sake of keeping a few cayuses? BUY A TRACTOR AND DO YOUR DUTY. La Grande Implement Co. has them. Come and see.

"ECONOMY"

DON'T SELL THAT OLD SUIT to the rag man, because it looks old—it has a lot of life in it, and needs only Cleaning and Pressing to make it last another season.—TRY IT.

Zwiefel Tailoring, A. B. Rogers
 Foley Hotel Building, Adams Avenue.

Mr. Grain Farmer:

Are you prepared to handle your grain in bulk? Do not wait until Spring and Summer when you are buried with work and worried with labor shortage, but build your granaries now.

You can buy the lumber and roofing paper for a first-class 1000 bushel portable granary for \$54.58 and it will last for years. Sacks for the same amount of grain will cost you \$125.00 and this would be a dead loss against this year's crop.

A granary of this size can be moved anywhere and can be filled directly from the thresher, doing away with high priced labor handling and sewing sacks.

The boys in the trenches need the sacks for sand bags for the protection of their very lives and perhaps your boy is among them.

Spend your money in your own valley by buying lumber manufactured at home. When you buy sacks part of the money goes to India.

BUILD YOUR GRANARIES NOW

Be prepared by building them before the farming season opens up. Be sure to get good lumber, well seasoned, as low grade lumber will give you trouble in a few seasons. Don't use green lumber.

Save money—keep what you spend at home—prevent loss and damage from exposure to weather—leave the sacks for our boys in the trenches; help win the war by building granaries now.

Portable granaries of this type are universally used in other sections. One trip with a good team will haul the material for one granary. For particulars as well as prices on Union County lumber for all farm purposes, see
