School started Monday with a surprisingly heavy attendance of 70 in the grades and 40 in the high school.

OUTLOOK IS GLOOMY

Peace Fiasco Received With Discontent By Central Powers.

ZURICH, Sept. 18.—Vienna newspapers are greatly excited over British and American press comment on the Austrian peace proposal. It is rumored that Foreign Minister Durlan will resign.

A Berlin dispatch declared that the same excitement is evident in political circles and that the position of Chancellor von Hertling and Foreign Minister von Hintze appears critical.

The resignation of Hungarian Premier Wokerele also is imminent, according to Dudespeit advices.

Experience the Best Teacher.

It is generally admitted that experience is the best teacher, but should we not make use of the experience of others as well as our own? The experience of a thousand persons is more to be depended upon than that of one individual. Many thousands of persons have used Chamberlain's Cough Remedy for coughs and colds with the best results, which shows it to be a thoroughly reliable preparation for those diseases. Try it. It is prompt and effectual and pleasant to take. Av.

DESTROYER AND U-BOAT FIGHT

Diver Believed To Have Been Destroyed By American Warship

LONDON, Sept. 19.—Ensign Oliver Isen Jr., of New York, tells a thrilling story of a sea fight in which an American destroyer badly damaged and probably sank a German U-boat, in a letter just received here by one of his friends.

"The day before the scrap," he writes, "we rescued 125 French sailors and five officers from life rafts upon which they had taken refuge after the torpedoing of the French cruiser Du Petit Thours."

"The next morning our destroyer and the submarine were dogging each other, probably without knowing it. In the afternoon we turned suddenly and saw the periscope and coming tower of the U-boat a few hundred yards off our port bow."

"We went for him full speed. He disappeared, but a few seconds later we let go several depth charges. Turning we were repeating the performance when we saw the U-boat again, with his rudder probably damaged, trying to get to the surface."

"We let go with four shots from our guns. It was the prettiest shooting I ever saw. The last two shots were direct hits. The men at the guns said they could just make out the bow of the U-boat tilted upward at a good angle and that they also saw lots of oil in the wake of the sea prowler."

"We rushed, trying to ram the U-boat, but when within 100 yards he disappeared. Within a few seconds the forward watch shouted 'There he is!' We hung depth charges and brought up lots of oil."

"The men of the gun crew say they saw the submarine as we passed over him, with the bow pointing at a sharp angle and with a heavy list to starboard. The U-boat was stationary as far as we could tell, and the last two depth charges were dropped directly on him, but I guess the prowler was pretty well done for before."

"Excited and hilarious, the Frenchmen climbed over the superstructure to the lifeboats and everywhere we dropped a depth charge they cheered and shouted 'Vive la Amerique!' and clapped their hands."

You Can't Eat Meat 100 Miles Away

Preparing meat is only a part of Swift & Company's usefulness.

The finest meat in the world wouldn't do you any good one hundred miles away from your table.

Swift & Company efficiency has made it possible to place complete lines of products in the smallest and most remote communities.

To be sure the work is done well Swift & Company, through its branch houses and car routes, brings the meat to the retail dealer for you.

Swift & Company lays out car routes covering towns—big, little, medium size—which are not served by a Swift branch house.

Salesmen find out in advance what is wanted by the dealers in every town.

They are followed by refrigerator cars loaded with retailers' orders, which are delivered at each town—fresh, clean, and sweet—once or twice each week.

Swift & Company operates a large number of car routes like this, from fourteen distributing plants.

This is a necessary and natural part of the packers' usefulness. It fits into the industry in an orderly, effective way. It makes better meat cheaper from one end of the land to the other.

TURKS ARE GETTING WEARY OF THE WAR

ZURICH, Sept. 18.—Intense suffering from famine and lack of clothing is prevailing in Turkey and Austria-Hungary. The Turkish delegation to a conference in Vienna, which preceded the sending of the Austro-Hungarian peace note, told of the miserable conditions in Turkey and the war weariness of the nation.

Food riots are prevailing in many parts of Austria-Hungary, as well. Under-nourished babies are dying by the thousands.

Hundreds of women mobbed and looted stores at Boudjak. Martial law had to be proclaimed.

In Vienna families of the most respectable class appear in their bare feet.

It is reported that the sultan of Turkey will visit Vienna in about two weeks.

PRISONER RELEASED

Brother Of Rev. Upton H. Gibbs Again With His Family

A note from Upton H. Gibbs, formerly rector of St. Peter's church in La Grande, and now publisher of the local paper at Escatawpa, says:

"My brother, Col. Gibbs, who was wounded and taken prisoner by the Germans at the battle of Mons in August 1914, has, after four years of captivity, been released and is once more at home again with his family."

Moving Pictures for the Home.

A comparatively inexpensive combination moving-picture camera and projector for amateur use is illustrated in Popular Mechanics Magazine. It bears about the same relation to costly and heavy professional machines as a compact, light camera does to a cumbersome apparatus employed by portrait photographers. Exclusive of its tripod, the new movie camera weighs less than three and a half pounds. It uses standard film and is operated as easily as any simple "still" instrument. The capacity of its magazine, designed for daylight loading, is twenty feet, which, because eight instead of sixteen pictures are taken per second, records as much action as forty feet of film in a professional machine. Sharp, clear pictures capable of reasonable enlargement for "stills" are obtained. By changing the lens attaching a light frame with reels of 200-foot capacity, and mounting a small, cylindrical lamphouse, the camera is converted into a projector.
