

Normal Schools Local In Their Character

The enrollment of Monmouth Normal, in common with every other normal in the country, proves this fact.

At Monmouth only 19 students come from the seven counties of southern Oregon, 24 students from the 16 counties of eastern Oregon, while 126 students come from the 13 counties closest surrounding the town of Monmouth.

Monmouth does not now and it never can furnish even a beginning of an adequate supply of trained teachers for the boys and girls of eastern Oregon.

Parents, we say to you frankly, do your boys and girls deserve this lack of educational advantages?
