Why We Are Selling Lalley-Light

The day of Electricity on the farm is just dawning. Lalley-Light convinced us that it is, by far, the most reliable, efficient and economical farm electric light and power plant on the market.

In brief, these are the reasons why we have taken the local territory for the retail sale of the Lalley-Light.

This plant has eight years of successful, every-day farm-use behind it.

Its dependability, its quality, its low cost of operation, its long life, and its almost total freedom from repairs and replacements are established facts.

We take no chances in recommending the Lalley-Light; and the farmers who buy them take no chances.

Lalley-Light on the farm means the end of a great deal of inconvenience and discomfort; the saving of much labor; and a degree of fire protection impossible with any open flame light.

It means running water in house and barns, if the owner cares to install a water system.

It means save light in house and barn and out-buildings.

It means endless power to run cream separators, churns, washing machines and a half dozen more labor-saving devices.

In a word, it literally makes-over farm living conditions; and does much to improve working conditions.

We believe so thoroughly in Lalley-Light that we have contracted for a stock of plants, from which installations can be made without shipping and other delays.

Lalley-Light, once the buyer and his family have familiarized themselves with its simple mechanism and its operation, needs practically no service from the dealer.

Nevertheless we are prepared to render whatever service may be necessary, now or in the future.

Our salesrooms are equipped to give you a demonstration of Lalley-Light in operation.

Or, if you prefer a demonstration at your home, telephone and we shall be glad to give it, without cost or obligation to you.

In any event, make it a point to see Lalley-Light in operation as soon as possible.
