### Economical Army Rations

How the Monks, like the Italians, put up an army fat for their forces in sausage casing, but go them two better in also utilizing the strong bamboo fiber tissue paper and thin sheets of dried liver as containers. Mr. Lodian describes as follows: "The liver is cut into thin sheets and wrapped around the fat. In drying, like the Italian cheese covering, it contracts and keeps its contents airtight. The whole thing is sealed in a tin, the whole thing being made in a factory."
