COAL OUTPUT IN 1918 HEAVY

PRODUCTION IS 31,000,000 TONS MORE THAN IN 1917.

Restrictions Removed on Shipments of Anthracite—Oregon Gets Supply Again.

PORTLAND, Jan. 17.—Coal production in the United States during 1918 showed an increase of 34,000,000 tons over 1917, according to estimates furnished by the United States Fuel Administration to fuel administrator Fred J. Holmes. The increase was on bituminous coal, anthracite showing a slight decrease.

Production in 1918 was more than sufficient to meet the demands of the country.

Production of coke during 1918 is estimated at 56,676,000 net tons or an increase of 3 per cent over 1917. The increase is in by-product coke production, besbliva coke having decreased 8 per cent in production during the year.

In comparison, no European country has enough coal. In Italy and Switzerland the privations felt by its lack are acute, and in general the question of how the various peoples will react is a sober one. Italy has no coal for household heating and gas for cooking is limited to four hours a day.

All restrictions on shipments of anthracite egg size have been removed by the anthracite committee of the United States fuel administration, and this grade coal may now be obtained freely for consumption throughout the country. Anthracite has been barred from Oregon since last spring.

Pamphlet containing instructions on how to burn soft coal in the home are available for distribution at the office of Fuel Administrator Fred J. Holmes, 1337 Northwestern Bank building, Portland.

Keep the home warm with less fuel by observing efficiency methods of firing.

Soldiers of France in Greatest of World's Sacrifices

Soldiers of France have led in the world's sacrifice of blood and treasure that liberty and democracy should not perish from the earth.

The world will forever owe France a debt of gratitude for this as well as for an invaluable remedy for stomach, liver and intestinal disorders which its peasants have been using with reported marvellous results.

The ingredients are now imported and sold in this country by Gen. H. Mayr, prominent Chicago chemist, under the name of Mayr's Wonderful Remedy. It is a simple, harmless preparation that removes catarrhal mucus from the intestinal tract and allays the inflammation which causes practically all stomach, liver and intestinal ailments, including appendicitis. One dose will convince or money refunded. For sale by druggists everywhere.—Adv.

REPORT OF CITY MANAGER

STATEMENT SUBMITTED TO COMMISSIONERS

Shows General Warrants of About \$10,000 Called in, Leaving One Year of Arrears Outstanding

Following is given in full the report of John Collier, city manager, for the week ending January 11th, which was laid before the board of city commissioners at their meeting Wednesday night:

La Grande, Oregon, Jan. 15, 1919 To the Honorable Commission, City of La Grande, Oregon, Gentlemen:

I have to report for the week ending January 11, 1919, as shown by the reports from the several departments:

Two small fires, one at Mrs. Cullen's property on Cherry street caused by fire-used in thawing pipes under the house, the other at the Palmer mill bridge in some piling.

The police department reports no arrests for the week and fines collected from a former case amount to \$9.00.

Receipts and disbursements in the treasurer's office were as follows:

Receipts	
From water rents	\$1513.50
Imp. Dist. interest	213.46
Imp. Dist. installments	953.92
Licenses	5.00
Building permit	.50
House rents	10.00
Certificates of sale	737.21
Taxes	1,394.18
TOTAL	\$4,007.16

Disbursements	
For Imp. Dist. Int.	\$1,464.37
Int. on bonds	375.00
Gen. warrants	1,774.00
Gen. warrants Int.	175.98
Total	\$3,789.35

General warrants to the amount of about \$10,000.00 have been called by the treasurer and improvement bonds to the amount of \$8,000.00 as per orders of the commission at their last meeting. This brings the outstanding warrants up to January 1, 1918, or practically one year in arrears.

I hope to be able to give a complete report of the general financial condition of the city at an early date. Just at present we are handicapped through lack of clerical help.

The Water Department has been very busy since my last report thawing out frozen pipes. The mains are practically all open now and taps running except in a few instances where pipes could not be reached with the electric thawer. The street force was used one day during the mild weather to clean the streets so far as practicable.

The librarian has filed her annual report for the year 1918. As the report has been published in full in the La Grande Evening Observer it is not necessary to go into details regarding same. I would say, however, that the vast amount of work done and the splendid condition of the library as shown by the report reflect much credit on both the board of directors and the librarian.

A meeting of the heads of all the departments was held Saturday night and a general round table talk had on the needs of the city and the work to be done. A number of good ideas were advanced and I am assured the hearty co-operation of all departments. One of the principal thoughts suggested was that any contemplated improvements should be considered with the idea of using the surplus labor that will likely be caused through the return of the men in the service.

I have just learned from the caretaker of the Hoover Creek Intake that the surplus water in the reservoir is exhausted and that there is not sufficient in the creek to supply the city. It will therefore be necessary to make arrangements to get the balance from the Grande Ronde river. In this connection I would mention that I have taken up with manufacturers of chlorination plants the matter of installing a plant for us and hope to have plans and figures in a day or two.

The caretaker at the intake has been instructed to put in his spare time during the winter months clearing the trees and brush away from the creek between the main dams and the intake and to place logs or boulders in the stream in such a way as to catch the stones that are washed down the stream. The object of this is to give the water more sunlight and to form ripples in the stream, which will break up the water and give it more air.

Respectfully submitted,
 JOHN COLLIER,
 City Manager.

HOME INDUSTRY FACTS

USE HOME PRODUCTS
HOME INDUSTRY LEAGUE OF OREGON
 Workers in Oregon's industries should find especial pleasure and satisfaction in favoring Oregon products in their buying. By so doing they are helping to support other Oregon workers on other Oregon pay rolls in their brother's fashion.

STATE POLICE PROPOSED

SALEM, Ore., Jan. 17.—Creation of the department of state police is proposed in a bill introduced by Senator Orton of Multnomah.

The bill provides for an appropriation of \$60,000 for the support of the department for a two-year period.

A superintendent of state police to be appointed by the governor at a salary of \$3000 a year, and the selection of twelve police officers by the superintendent at salaries of \$1500 annually each, are the main provisions of the bill. The office of the superintendent is to be at Portland, where a deputy, at a salary of \$2400 a year, is to be in charge.

The bill carries an emergency clause in order that it may be made immediately effective if it is enacted into a law.

"FLU" SERUM TAKEN NORTH

DAWSON, Y. T., Jan. 17.—Six Royal Northwest Mounted Police constables have left here with dog teams over the long snow trail to the Arctic coast, carrying anti-influenza serum which arrived here over the winter trail from the outside world.

To keep the serum from freezing, the officers carried it in belts next to their skins.

MONTANA TOWN IS BURNING

MISSOULA, Montana, Jan. 17.—The town of Bonner, eight miles east of here, is reported to be burning. The W. A. Clark mills are located there and it is thought they are on fire.

The girl at the telephone office could not hold further conversation with Missoula, saying that the town was on fire and she was on the point of leaving because of the heat.

The milk is already in it

So rich you need no eggs

Just add water, and you have delicious pancakes

How the perfect pancake formula was worked out

Years ago the Aunt Jemima people realized that when a woman mixes pancakes herself she could never be sure how they would turn out. Some days they might be good—but other days, when she thought she had done everything just the same—the cakes would turn out flat, tough and soggy.

To give every woman a way of making cakes that always come out wonderfully—always light and fluffy and tender—Aunt Jemima Pancake Flour was created.

The treasured recipe of a famous Southern cook was adapted as the basis of the formula. Long study was put in perfecting it. Especially ground and blended flours were used—flours that you could not buy in a store. And finally, since good pancakes need sweet milk, that was added, too (in powdered form).

No wonder Aunt Jemima Pancakes have

such an unusually delicious flavor—no wonder 120 million Aunt Jemima breakfasts were served last year!

So quick and easy—and so nourishing

Aunt Jemima Pancakes have just the nutritious, wholesome elements that your family needs—their gluten percentage is unusually high. They have the food value that gives youngsters strong bodies and plump, rosy cheeks.

Have Aunt Jemima Pancakes tomorrow—and some other day have the Buckwheat Cakes (Aunt Jemima Buckwheat Flour comes in the yellow package). Try waffles and muffins made with the Pancake Flour, too, they're delicious. Read on any Aunt Jemima box how to get the famous Ray Dolls. Aunt Jemima Mills Company, St. Joseph, Missouri.

Richer because of the milk that's in it!

Sweet milk, powdered and mixed in the flour gives Aunt Jemima Pancakes the flavor that has made them America's favorite breakfast. You need add nothing but water to have rich, full-flavored cakes.
