John E. Anderson, the Maxwell dealer of La Grande, arrived home yesterday after a couple of weeks spent in Detroit and other eastern cities. Mr. Anderson says the shortage of cars is easily accounted for when one enters the different factories which are now producing a small per centage of their output due to labor shortage. He believes however that within the next thirty days there will be a change for the better and he looks for more cars in a short time.

Badger Kills Chickens
Out at M. L. Carter's place Friday night a great commotion was

heard at the chicken house and a flock of attack were quickly made against what was supposed to be a skunk. It was found that fairly large small chicks and about a half dozen of the trying size had been killed, but it was a badger and not a skunk that did the mischief. This, according to the report from M. Carter, is the first known case of a badger attacking chickens the time the badger was caught in the act while the animal of the noxious odor has a completely established alibi.

Exhibit Attracted Wide Attention
Probably one of the most attractive exhibits at the Union Stock show was that of Nate Zweifel, who had a complete Deleo Lighting Plant at the Stock show and gave demonstrations that completely astounded those not familiar with wonderful work of the Deleo. He not only had the lighting system at work but he also chains, irons, fans and every conceivable labor saving device for the home cook up to the Deleo generator and exhibited what might be properly called an "electric home." So taken were the many visitors with the exhibit that many stayed close by it for hours in order to be properly informed of its merits. Two complete plants were sold by Mr. Zweifel during the show and several others are ordered for later delivery.

The management has issued the following statement: "Cove expects a big crowd from La Grande and we are doing our best to make the fans see they owe it to Cove to do so. The fishing in that vicinity is excellent and La Grande can go over in the morning fish a while, camp for dinner and go to the ball game in the afternoon."

Hard practice has been the rule here and the locals are out to win.

News From Ensign Forrest Ivanhoe
Mrs. A. E. Ivanhoe, county superintendent of schools, has received welcome news from her son, Ensign Forrest Ivanhoe, U. S. N., to the effect that he and his wife have returned from Samoa, where they had been for the past year, and that he has been assigned to duty at Mare Island, Calif. The letters which he and his wife wrote home during their stay in the tropics, says Mrs. Ivanhoe, indicated that they had a most interesting and enjoyable experience there.

Has Not Yet Appealed Case
Joseph M. South, who paid a fifty dollar fine the first of the week

and whose attorney, R. J. Kitchen, applied to the city commission for a refund of the fine Wednesday night last on the grounds that his client would appeal the case to the circuit court, has not yet filed any appeal. While The Observer Thursday stated that the name of the man in the case was Scott, South was the man. He is the state organizer for the Y. M. C. A. South, who is a married man with his home in Portland, is alleged by T. J. Robertson, of this city, to have been responsible for the breaking up of his home. Robertson's wife left him last November, with three small children on her hands, and he blames South for her departure. Robertson and South met on the street one evening about a week ago, when South happened to be in town and Robertson directly pressed his charges. Words ensued and South got the worst of the skirmish which followed. Both men were arrested and came up in court last Monday when the whole story of the alleged home-wrecking activities of South became known. Robertson charged that his was not the only home which had been disrupted by South. South got off with a fifty dollar fine and an expression of opinion from the court that was not at all complimentary and Robertson was fined \$10.00. South paid the fine and left town and as he has not yet filed the appeal it is considered that he feels he got off easy and is content with the court's decision.

UTAH TO SPEND \$8,000,000

Part of Money to be Spent for Improvements on Arrowhead Trail to California.

The state of Utah has decided to spend about \$8,000,000 on roads in the next two years, with an expenditure this year of about \$2,000,000. Some of the Utah millions, which are made up of state and federal funds, are going to be used on the development of the Arrowhead trail, which is tributary to all parts of southern California, from San Diego and Imperial valley on the south to Fresno and San Luis Obispo on the north.

\$300,000,000 FOR HIGHWAYS

Sum Which If Capitalized at 5 Per Cent Would Represent Investment of \$6,000,000,000.

Government road officials estimate that road construction and maintenance in the United States involve an annual outlay of over \$300,000,000, a sum, which if capitalized at 5 per cent, would represent an investment of \$6,000,000,000. There has never been a nation-wide traffic census to show either the direction or volume of traffic over these highways.

Roads Must Be Linked Up.

If we are to keep costs down, our highways must be linked up and there must be through trunk lines provided to which feeders can be built.

Lower Hauling Costs.

Hauling costs are lowered by good roads because the size of the load is limited by the worst spot in the road.

One of Major Activities.

Road building will shortly become one of the major activities of our government.

Why So Many Prefer The Brunswick

THE Brunswick Method of Reproduction is the wonder of the phonographic art. And it wins acclaim from two principal ideas: The Ultona and The Brunswick Tone Amplifier.

The Ultona is an exclusive invention, an all-record player to be had only on The Brunswick. It plays all makes of records as they should be played—with the proper needle and the precise weight—and with the proper diaphragm.

The Brunswick Tone Amplifier is built entirely of wood, according to a new process. In this "throat" of the phonograph all metal is discarded. This brings purity and volume of tone. There is an absence of the usual metallic sounds. You've never heard any record at its best until it is played on The Brunswick.

A tone test at a Brunswick shop is conclusive evidence. Your ear is a quick judge.

Your admiration for this superior phonograph will compel you to award The Brunswick first place. Come in today. Your judgment is final.
