"Tall Aches From Little Toecorns Grow"

—This is not quite the way we used to write it in the old copy book at school, but nevertheless, it clearly expresses the feeling of hundreds of those who suffer untold agony every day with an incorrigible corn or callous.

—To these sufferers, we say, come to us and we will show you an **absolutely new method** for relieving and curing those ACHES. It costs only 25c, and we guarantee it to give satisfaction or money refunded.

CITY MANAGER'S REPORT

I have to report for the week ending June 21:

From the Treasurer's office:

Receipts

Water rentals	$ 69.85
Imp. Dist. Installments	263.18
Imp. Dist. Int.	105.72
Licenses	26.00
Electrical permits	2.50
Franchise tax (H. I. T. Co.)	74.21
Total	$541.46

Disbursements

Gen. Warrants pd.	580.15
Park salaries	214.90
Park fund	1.75
Total	$822.81

From the records, receipts from fines $65.00, horses issued for pool hall, 11 warrants drawn on park fund $295.75. The street force have been employed in the usual routine work and in addition have put in a new cross walk at Fourth and Dickson streets. This latter is in connection with the walk ordered on North Fourth street, the party owning the adjoining property having constructed the necessary walk along same. The water force in addition to the regular work has put in several new meter boxes and made one tap for the Warren Construction Company on Cove avenue. The caretaker at Beaver Creek was unable to close some of the valves in the well at the dam and it was necessary to send some additional help. The dam has now been closed and there is still ample water between that point and the intake to supply the mains at the intake. The expert engineer, the water superintendent and the manager went over the several features of the water problem last Thursday, making a trip to the reservoir, to Perry and beyond. The engineer's recommendations to the present were that the pipe line be covered from the reservoir to the top of the hill above the city, that the Beaver Creek pipe line be meter-

ed to ascertain the flow of water and that the pipe line be tapped at the high points to ascertain if the flow of water is being retarded any on account of air pockets. The water in the Beaver Creek reservoir is within about three feet of the spillway and still is gradually rising according to the report from the caretaker at Beaver. The engineer's estimate of the capacity of the pipe line is 1,675,000 gallons per twenty-four hours and our records show about 1,600,000 gallons consumption per twenty-four hours in May of 1918 year. This shows a surplus of about 675,000 gallons per day but as we are unable to get any surplus in the city reservoir and in fact are scarcely able to supply the daily requirements, it is apparent that we are not getting the maximum amount through the pipes or there is a considerable quantity that is yet unaccounted for. This condition is the reason for the engineer's request that the above data be ascertained.

The engineer is also considering the matter of an auxiliary supply but has made no definite recommendation as yet. Under the existing conditions it is imperative that water be conserved as much as possible. The manager has asked water users to irrigate on alternate days in order to lessen the drain during the afternoons and evenings and if the request is complied with we may be able to meet the requirements. The long dry season is taxing the system to the limit.

In the fire department there were two calls during the week; one to the stock yards where it was found the roof of the hay barn had been set on fire by sparks from the switch engine; the other to the Grande Ronde Lumber Company's plant on Greenwood street. In this case grass on the property adjoining was burning but the fire was soon extinguished. No material damage was done in either case.

Fifteen arrests were made by the police force for the week; one for state officers, one for disorderly conduct and thirteen for traffic violations. Fines collected $85.00.

Respectfully submitted,

JOHN COLLIER,

Manager City of La Grande

CANVASSING FOR COIN SHOWS RESULTS

ey will be used in our regular work.

"It is gratifying, indeed, to note the overwhelmingly loyal friendship of all business men and citizens to our people and we have yet to find anyone who does not agree that the Salvation Army is a needful organization in the great scheme of living. I realize fully this conclusion is arrived at by people who view the material things we do—the suffering we relieve, and the young people we reclaim. But down deeper than all that is the joy and satisfaction in every Salvationist's heart that he is carrying the teachings of Christ to multitudes who might otherwise not receive it. We believe the drive in Union county will be successful and when this county has gone over the top we will all know that provision has been made for a year or two that we will work all the harder to direct the footsteps of people into the paths laid out by the meek and lowly Nazarene."

BRYAN MAY COME TO LA GRANDE

(Continued from Page One)

and offered to guarantee the amount himself.

Armed with this information, City Manager Collier wired Dr. McMillan this afternoon that La Grande was ready to take on the Bryan contract. Until word is received, the matter will be uncertain, but it is thought Mr. Bryan will be secured for a speech on July 12.

CROP OUTLOOK FINE IN WEST

Heavy Drop of Apples and Pears in Hood River Valley Has Cut Down Crop Estimates

PORTLAND, June 26.—Winter wheat prospects in the Willamette valley are excellent, according to the weekly weather and crop summary, issued by the United States weather bureau here. Drying winds and lack of moisture are causing some anxiety to wheat growers east of the Cascade mountains. Some wheat will be ready to cut within the coming week. Rye is mostly harvested in Lane county and is ready to cut in other sections. Spring sown grains as a rule, are in need of moisture, and unless rain comes soon the prospect for these crops will fall below the average. Corn is still backward, owing to cool night, but is making fair progress.

The weather has been ideal for haying in practically all districts. The first crop of alfalfa is mostly cut and the second crop is getting a good start. Pasture and the lower ranges are drying rapidly but mountain ranges are still good and stock conditions in prime condition.

The drop of apples and pears in Hood River valley has been rather heavy, and all cut down somewhat the previous estimate regarding these fruits. Late cherries are ripening and a fair crop is indicated. Generally the fruit situation is satisfactory.

Potatoes and gardens are doing well, but would be improved by rain.

The Demand Of The Day

is for service which actually serves—augmented by a sincere personal interest.

The business man who associates himself with this institution enjoys the benefits of our exceptional facilities—supplemented by the willing and helpful advice and cooperation of our staff of experts.

CHURCH SHOULD WELCOME MEN

SO SAYS WILLIAM C. HARVEY, HERE THIS WEEK.

Mr. Harvey Is Working For Organization In Churches of Committees to Welcome Soldiers.

For the purpose of organizing in the churches of the city welcoming committees to look after returning and returned soldiers, William C. Harvey, representing the army and navy departments of the Brotherhood of St. Andrews, spent yesterday and this morning in La Grande. Mr. Harvey spent 18 months at Camp Lewis working among the soldiers and having learned to know the men in the service—both their hearts and their minds—he declares that the men are not receiving from the people at home the sort of a welcome that was due them, nor the consideration nor treatment that their service to their country has earned for them.

The church, Mr. Harvey believes, is the proper body to take up with special attention the matter of welcoming the soldiers, and he accordingly visited the local religious organizations to get a movement started among them.

The Society of St. Andrews, which has its headquarters in Philadelphia, is the oldest religious brotherhood in the world today, being in its thirty-sixth year.

The Place You Get Everything You Want Every Day, at the Price You Like to Pay.

Boquets

Our competitors delight in handing themselves "bouquets"—they claim leadership in **everything—except this one thing—the most important of all**—it's this, lowering the selling price. Understand, we don't admit that they lead in a lot of other things they claim, but we want to emphasize the fact that

WE!!

are the ones that lower the prices of meat in this city and valley; Mr. Customer, WE are the first to lower and the LAST to raise our selling price, when the decrease or increase price of livestock admits or demands a change.
