WANTED—Clean, cotton rags for wiping machinery, 3 cents a pound.

DOINGS OF THE VAN LOONS

Ancient Admonition.

Thoughtless persons who insist on talking during a musical performance, mar the pleasure of those who would listen to the music, we have always with us. It is curious to note that this particular pest was already extant more than 2,000 years ago. In the ancient book "Ecclesiastes" we read, "Speak, thou that art the elder, for it becometh thee, but with sound judgment, and hinder not music."

The Chrysanthemum.

It is believed that the first specimen of the chrysanthemum in Europe was reared at the Botanic gardens, London, in 1594. The flower's rise into favor was chiefly due to the Stoke Newington Chrysanthemum society, which held its first exhibition of blossoms in 1843 and served as a school of chrysanthemum culture for the world.

The Chief Object.

Set before you, as the chief object to be obtained, an end that is superior to any on earth—a desirable end, a perfect end. Labor to accomplish a work that shall survive unchanged and beautiful, when thrones of power and monuments of art shall have crumbled to ashes; aim to achieve something, which, when these mutable voices are hushed forever, shall live amid the songs and triumphs of immortality.—Edwin H. Chaplin.

Youth Will Seek Its Fortune!

Japanese are sturdy voyagers. Recently, when many Japanese were going to Brazil, a patriarch of ninety gathered his descendants to the number of forty-four and at their head fared forth to South America in search of new adventures and a fresh fortune; he already had a very handsome competence stored away.

Diamonds of Many Colors.

Although when free of color they are said to be of first water, diamonds are found in nearly every color of the rainbow—red, yellow, orange, green and blue.

Drew Many to Worship.

Describing the three fair daughters of an aristocratic New Yorker a century or so ago a writer of the period says: "The father used to take his daughters to the church of Doctor Matthews, that stood in Garden street. Such a lovely trio were rarely seen. They took all the young gallants from the other downtown church and drew a full house."

To Frost Glass.

It is often convenient to frost bottles and lenses, and here is a method by which this work may be done at home. To a mixture of 24 ounces of ether and 38 ounces of benzine add two and a quarter ounces of sandarach and half an ounce of mastic. The parts to be frosted should be immersed in this solution a few minutes.

Glass-Bottomed Bucket.

A curious sight at Palermo is to see the fishermen spearing fish by the aid of glass-bottomed buckets. There are many corners of the world where fish are speared, but perhaps the use of the glass-bottomed bucket in this connection is to be seen only at Palermo.

Thing That Really Counts.

The great thing in this world is not so much where we are, but in what direction we are moving.—Oliver Wendell Holmes.

OIL GROUND FLOOR OIL OPPORTUNITY OIL

To Prospective Investors:

Many are familiar with the large returns from successful oil operations. The fortunes that have been made are fabulous and no greater have been made than will be made in the near future.
There is a chance for a number of Oregon men to join in a ground-floor proposition. A lease has been secured in a positively proven field. Oil wells now producing border the lease. The oil in this field is high grade, selling at present at 75 cents more for each barrel than other oils.
It is in a field that requires a 2800-foot depth to reach the oil sand, and the wells are pronounced long-lived. Pipe lines are in and market is positive as soon as oil is struck.
To those who would like to invest, here are a few things to be remembered—things that are seldom obtainable in oil investments:
First.—The field is proven. The lease adjoins oil production at the present time.
Second.—This is not a company to sell stock, but a chance for a number of people to pool capital and put down a well, benefitting from what returns come from the venture.
Third.—The lease and drilling will be under supervision of a man who has had years of experience in the oil business and has drilled in some of the best wells in the field. He is a man thoroughly honest and is known to Eastern Oregon people, capable of giving references that would satisfy anyone. He is financially interested now and will give the work his individual attention.
Fourth.—All money invested will be placed in an Oregon bank and perfect accounting will be kept, rendering statements at all times.
Fifth.—No salaries are to be paid except for the labor in drilling the well and no expense will confront the investment except the essential expense necessary to the drilling and the lease as it is developed.

If you have ever had an inclination to invest in oil you could get no better opportunity than this ground-floor proposition for it will be handled by people who are reliable in every way. Usually the investor buys stock in a company, not knowing its officers, its manager and unmindful of oil experience of anyone connected. In this case there are no officers at present, for this is an invitation to people who honestly want to drill for oil to come into an investment which will be officered later and organized in whatever way those now investing see fit.

The drill is at hand, ready to work, but it will not be moved on the lease until \$20,000 is secured, for there is no intention of having a half-drilled well. If you feel interested and want to join square people in an effort to make money out of oil, now is your opportunity.

The oil field is one of the big producing sections of the mid-continent field. It is to experiment and no one is asked to assist in bringing in a new oil zone. With oil being produced in large quantities adjoining this lease, with pipe lines in, the only chance that is being taken is to drill in an oil well, which certainly looks more than promising when the surroundings are considered.

Please address, stating the amount you are willing to invest.
