Loss of Appetite
As a general rule there is nothing serious about a loss of appetite, and if you skip a meal or only eat two meals a day for a few days you will soon have a relish for your meals when meal time comes. Bear in mind that at least five hours should always elapse between meals so as to give the food ample time to di-

is indicated by the above diagrams. The field of clearly defined vision through an ordinary lens of average power is represented by an angle of 32 degrees, while the scientific correction of PUNKTALS increases this angle to 60 degrees in all powers.

This means that ordinary lenses give truly clear vision through the central portions only, while with PUNKTALS such results are obtained from margin to margin.

These new lenses are worth investigating. Ask us for booklet, "The Eye and the Lens."

We have the only Verter Refraction Case in Eastern Oregon, enabling us to correctly fit and prescribe Punktal Lenses.

BOIL YOUR DRINKING WATER
Owing to a breakdown in the chlorinating plant and the impossibility of getting a sufficient supply of water from Beaver Creek at this time it will be necessary to pump some water for a few days from the Grande Ronde river without chlorination. It is therefore deemed best that water for drinking purposes be boiled until the chlorinating plant can be repaired.
