OIL GROUND FLOOR OIL OPPORTUNITY OIL. To Prospective Investors: Many are familiar with the large returns from successful oil operations. The fortunes that have been made are fabulous and no greater have been made than will be made in the near future. There is a chance for a number of Oregon men to join in a ground-floor proposition. A lease has been secured in a positively proven field. Oil wells now producing border the lease. The oil in this field is high grade, selling at present at 75 cents more for each barrel than other oils. It is in a field that requires a 2800-foot depth to reach the oil sand, and the wells are pronounced long-lived. Pipe lines are in and market is positive as soon as oil is struck. To those who would like to invest, here are a few things to be remembered—things that are seldom obtainable in oil investments: First.—The field is proven. The lease adjoins oil production at the present time. Second.—This is not a company to sell stock, but a chance for a number of people to pool capital and put down a well, benefitting from what returns come from the venture. Third.—The lease and drilling will be under supervision of a man who has had years of experience in the oil business and has drilled in some of the best wells in the field. He is a man thoroughly honest and is known to Eastern Oregon people, capable of giving references that would satisfy anyone. He is financially interested now and will give the work his individual attention. Fourth.—All money invested will be placed in an Oregon bank and perfect accounting will be kept, rendering statements at all times. Fifth.—No salaries are to be paid except for the labor in drilling the well and no expense will confront the investment except the essential expense necessary to the drilling and the lease as it is developed. If you have ever had an inclination to invest in oil you could get no better opportunity than this ground-floor proposition, for it will be handled by people who are reliable in every way. Usually the investor buys stock in a company not knowing its officers, its manager and unmindful of oil experience of anyone connected. In this case there are no officers at present; for this is an invitation to people who honestly want to drill for oil to come into an investment which will be officered later and organized in whatever way those now investing see fit. The drill is at hand, ready to work, but it will not be moved on the lease until \$20,000 is secured, for there is no intention of having a half-drilled well. If you feel interested and want to join square people in an effort to make money out of oil, now is your opportunity. The oil field is one of the big producing sections of the mid-continent field. It is no experiment and no one is asked to assist in bringing in a new oil zone. With oil being produced in large quantities adjoining this lease, with pipe lines in, the only chance that is being taken is to drill in an oil well, which certainly looks more than promising when the surroundings are considered. Please address, stating the amount you are willing to invest. OIL DEVELOPMENT, Care Observer, La Grande, Oregon. OIL THE FORTUNE PRODUCER OIL
