play comes when the warden, who finds Blackie in Mary's house, decides that she is more entitled to the man she loves than the law is, and leaves them to their interrupted happiness. It has its last showing today.

AN OPTIMISTIC PICTURE.

All who love optimism and are admirers of an ideal home life should see "Mrs. Wiggs of the Cabbage Patch," in which the beautiful Marguerite Clark will appear at the Arcade theatre Friday and Saturday. The theme is an elevated one and no one can see this splendid photoplay without experiencing mental uplift. It is charming in every way, and reflects great credit upon Paramount, its producer. The supporting company is ideal.

On the same program will also be shown the new two reel Patry Arlucky comedy called "Love." This is one of the popular "Patty's" newest and best comedies.

Large and appreciative audience.

The plot shows how Blackie, tired of the lawless life, tries to reform but is prevented by the underworld "frame-up" of Fred the Count which sends him into prison. How he escapes and returns to Mary, the girl whom he was about to marry when he was arrested, is one of the vivid and gripping scenes of incidents which go to make a production of unusual strength and appeal.

The climax and big surprise of the

OPPORTUNITY FOR RETURNED SOLDIERS

Enskilled men in Demand in Ship-Building Industry.

Special opportunities are now open to discharged service men to obtain vocational training in the ship-building industry at the same time they are earning excellent incomes. It is announced today by Colonel Arthur Woods, Assistant to the Secretary of War, who is in charge of the re-employment of ex-service men.

Men who are interested in these offers should apply to the Assistant to the Secretary of War, which will provide them with further information on this point. The chief opportunity is with the Submarine Boat Corporation in Newark, N. J., which offers from 45c to 55c per hour to men who are learning the trade at the same time it teaches them any of the following trades in its school: riveters, holders-on, heater, blippers and cutters, regulators, painters, ligamen, shipfitters, pipefitters, marine plumbers, pipe-covers, pipe hangers, steel-machinists and electric welders.

A man can become a proficient ship worker within six weeks to two months, depending upon the trade and his personal application, when he is put on production. He is taught right on the job and is producing at the same time he is learning. The records of this school show that many graduates are earning \$75 to \$100 a week as riveters, and very substantial wages in other related occupations.

This is typical of the manner in which large industrial concerns are responding to the request of the War Department for the training of unskilled discharged service men who are ambitious to become skilled workers but must at the same time be earning enough to support themselves.

A La Grande Man's Experience.

MINES AND A MISS ARE ELEMENTS IN NEW SERIAL.

Mystery mounted with the mysticism of the mindless known as Madire, of which the peak called Thunder stood even as a sentry among these giants. John Carr, millionaire miner, strangely disappeared on one of these almost supernaturally clear and crystalline days for which the region is noted, dropping over the brow of an icy precipice and out of sight.

OIL GROUND FLOOR OIL OPPORTUNITY OIL

To Prospective Investors:

Many are familiar with the large returns from successful oil operations. The fortunes that have been made are fabulous and no greater have been made than will be made in the near future.

There is a chance for a number of Oregon men to join in a ground-floor proposition. A lease has been secured in a positively proven field. Oil wells now producing border the lease. The oil in this field is high grade, selling at present at 75 cents more for each barrel than other oils.

It is in a field that requires a 2800-foot depth to reach the oil sand, and the wells are pronounced long-lived. Pipe lines are in and market is positive as soon as oil is struck.

To those who would like to invest, here are a few things to be remembered—things that are seldom obtainable in oil investments:

- First.—The field is proven. The lease adjoins oil production at the present time.
- Second.—This is not a company to sell stock, but a chance for a number of people to pool capital and put down a well, benefitting from what returns come from the venture.
- Third.—The lease and drilling will be under supervision of a man who has had years of experience in the oil business and has drilled in some of the best wells in the field. He is a man thoroughly honest and is known to Eastern Oregon people, capable of giving references that would satisfy anyone. He is financially interested now and will give the work his individual attention.
- Fourth.—All money invested will be placed in an Oregon bank and perfect accounting will be kept, rendering statements at all times.
- Fifth.—No salaries are to be paid except for the labor in drilling the well and no expense will confront the investment except the essential expense necessary to the drilling and the lease as it is developed.

If you have ever had an inclination to invest in oil you could get no better opportunity than this ground-floor proposition, for it will be handled by people who are reliable in every way. Usually the investor buys stock in a company not knowing its officers, its manager and unmindful of oil experience of anyone connected. In this case there are no officers at present, for this is an invitation to people who honestly want to drill for oil to come into an investment which will be officered later and organized in whatever way those now investing see fit.

The drill is at hand, ready to work, but it will not be moved on the lease until \$20,000 is secured, for there is no intention of having a half-drilled well.

If you feel interested and want to join square people in an effort to make money out of oil, now is your opportunity.

The oil field is one of the big producing sections of the mid-continent field. It is no experiment and no one is asked to assist in bringing in a new oil zone. With oil being produced in large quantities adjoining this lease, with pipe lines in, the only chance that is being taken is to drill in an oil well, which certainly looks more than promising when the surroundings are considered.

Please address, stating the amount you are willing to invest.
