Heating Stoves to Keep You Warm

You must have a heater to keep warm this winter, in fact you need it now to be comfortable these cool mornings and evenings.

We have a fine line of heaters this year which burn either coal or wood—one as well as the other—and which you can pay for in small, convenient installments.

A few of these stoves were damaged in shipping and the damage adjusted with the railroad company. Their loss is your gain as we are prepared to offer you a liberal discount on these damaged stoves, while they last. The first to come will be the first served.

Buy your stove from us and pay for it while you use it.
