# Read This Carefully!

It will be seen by looking over the table of payments following this paragraph that the average increase of taxation per thousand dollars of assessed valuation of property is but a little more than four dollars. The first year the increase is but half a mill. The fourth year the increase is but two mills and the highest point reached is but six and a quarter mills. The roads will have begun to pay their way long before the high point has been reached. Remember, the bonds are paid out at the expiration of the twenty-year period. While we have twenty years in which to pay for the roads, we have the use of them from the time of their construction.

The saving to automobile owners alone will more than compensate for the added taxation. The horse-drawn vehicles will also come in for their proportion of saving and the carrying capacity and saving of time are other items to be considered. A good road is a community economy and a good road is an inexhaustible source of pleasure.
