## RU-BER-OID and MALTHOID READY ROOFINGS

In the manufacture and selling of Ru-ber-oid and Malthoid Ready Roofings The Paraffine Companies, Inc., has been guided by the same high principles of built-in quality and a square deal to everybody that have made every Pabco Product the standard of its kind.

### How Quality is Built-In

From beginning to end every process in the manufacture of Ru-ber-oid and Malthoid is carried out by The Paraffine Companies, Inc. Certain plants are devoted to collecting raw materials. Rags, which are the basis of the felt, are assembled and cleaned and made into the strong felt. Crude oil is refined to produce the exact quality of asphalt necessary for best results. The felt is saturated with the water-proofing asphalt and is coated with a special compound to give it an extremely long life, all under the constant supervision of experts. From first to last the greatest care is exercised in the complicated processes. Samples of every run of roofing are subjected to various tests to see that every roll of Ru-ber-oid and Malthoid comes up to the high standard which has been set. This constant inspection and precision of manufacture make certain that the finished Ru-ber-oid or Malthoid is the best ready roofing that it is possible to produce.

### Its World-wide Use

Everybody on the Pacific Coast who knows anything about building construction knows that Ru-ber-oid and Malthoid Roofings are pre-eminently the ready roofings of highest quality. In foreign countries, too, from Alaska to Australia, from Siberia to Peru, Ru-ber-oid and Malthoid have become the standard. Their world-wide use is a guarantee of their dependability.

### The Dependable Product of a Dependable Company

The responsibility of The Paraffine Companies does not end with the production of Ru-ber-oid and Malthoid. Representatives are always at the service of any purchaser to advise and to answer any questions which may arise as to the application of roofing. Its service extends to the small farmer who buys one or two rolls of roofing, as well as to the jobbers, dealers and big industrial corporations.

From the raw material to their final application The Paraffine Companies, Inc., see to it that Ru-ber-oid and Malthoid Ready Roofings maintain their positions as the standards of their kind.
