Encouraging Bolshevism

Everything that falsely encourages unrest also encourages bolshevism.

Misunderstanding of American industrial organization, and of its benefits to mankind, leads to unrest, dissatisfaction, and radicalism.

For example, the Federal Trade Commission tells the public that the large packers had an agreed price for lard substitute (made of cotton-seed oil.)

It reproduces letters taken from the files of one of the packers, showing that such agreed price existed.

But it failed to mention that the agreed price was determined at the request of and in co-operation with the Food Administration!

Even the Department of Justice, in its unjust attempt to create prejudice against the packers, has made public these same letters, with no explanation.

How long must this kind of misrepresentation continue? In so far as it is believed, it not only breeds discontent, but results in injustice to our industry.

Let us send you a "Swift Dasher." It will interest you. Address Swift & Company, Union Stock Yards, Chicago, Ill.

Read This Carefully!

It will be seen by looking over the table of payments following this paragraph that the average increase of taxation per thousand dollars of assessed valuation of property is but a little more than four dollars. The first year the increase is but half a mill. The fourth year the increase is but two mills and the highest point reached is but six and a quarter mills. The roads will have begun to pay their way long before the high point has been reached. Remember, the bonds are paid out at the expiration of the twenty-year period. While we have twenty years in which to pay for the roads, we have the use of them from the time of their construction.

The saving to automobile owners alone will more than compensate for the added taxation. The horse-drawn vehicles will also come in for their proportional saving and the carrying capacity and saving of time are also factors to be considered. A good road is a community economy and a poor road an inexcusable extravagance.
