Incompetence
How universal is the sense of incompetence in human experience! Youth, maturity and even old age are ever reaching for the something else which they crave for the hour, which seems to be the essential need of the year while we occasionally meet natures who are holding every force of their working years to the end of attaining some great ambition, falling in which, life to them is but a fraction.—Robert Carroll.

Imperfect Vision In A School Child

often entails more than mere eyestrain. It must be remembered that trouble from imperfect seeing school work, comes not only from seeing words and figures wrongly but also from fatigue of the brain caused by eyestrain. Twenty-five per cent of children have defective vision. Frequently a bashful child fails to tell the teacher he cannot see the blackboard easily and so is unable to do his work—is accused of neglect and falls behind in classes—all because of lack of proper eye care. If your child has defective vision have it corrected by an Optometrist. Our equipment is the most modern in the optical Science.

It will be seen by looking over the table of payments following this paragraph that the average increase of taxation per thousand dollars of assessed valuation of property is but a little more than four dollars. The first year the increase is but half a mill. The fourth year the increase is but two mills and the highest point reached is but six and a quarter mills. The roads will have begun to pay their way long before the high point has been reached. Remember, the bonds are paid out at the expiration of the twenty-year period. While we have twenty years in which to pay for the roads, we have the use of them from the time of their construction.
