A Plot Marred.

"I hear that the grocer discharged you for swindling him," remarked Mackindie to a friend. "It's a lie!" said the latter. "He asked me to put a lump of lead under one of the scales and I did so, and then in a few days when he examined it he told me to leave. 'Did you not fasten the lead on properly?' asked Mackindie. 'Oh, certainly, I fastened it right enough,'" was the reply, "but it was under the wrong side of the scale that I put it, and it weighed against himself!"

Watch the Sun's Halos.

The sun's halos are good weather signs. Many weather prophets based upon the observation of halos are founded upon sound scientific principles. "Studies of the relation of halos to rainfall show that during the summer months 56 to 60 per cent of all halos are followed by rain within 36 hours. During the winter months 70 to 75 per cent are so followed.

Importance of "Now."

"Now" is ever ticking from the clock of time. "Now" is the watchword of the wise. "Now" is on the banner of the prudent. Let us keep this little word always in our mind; and whenever anything presents itself to us in the shape of work, whether mental or physical, let us do it with all our might, remembering that now is the only time for us.—Selected.

A Mystery.

One of the great mysteries of life is why the wise who admit they know so much seem always to own so little.

Powerful Dam.

By raising eight and a half feet the dam which impounds water for Bombay its capacity was increased 10,800,000 gallons.

The Windward Islands.

The Windward Islands belong to Great Britain. They consist of the islands of St. Lucia, St. Vincent and Grenada, with the smaller islands of the Grenadine chain. The islands, really, form three distinct colonies, united under a governor-in-chief, who resides at St. George's, Grenada. The Windward islands derive their name from their position, as do also the Leeward Islands to the east, being more exposed to the trade winds than the neighboring Leeward Islands.

Apt Reminder.

"Come upstairs and let me wash your hands," said Winnie's mother. "I don't want to go up!" wailed Winnie, aged three. "Let her wash them down here," called grandmother. "She can do it just as well." "No," her mother said firmly. "I want her to come up with me!" Winnie came upstairs as slowly as possible. "Oh," she said, turning a wrathfully tearful face to her mother, "why don't you obey your mother?"

Presidents Who Were Masons.

Masonic records of the early presidents are not complete. The following presidents are listed as Masons: Washington, Adams, Jefferson, Madison, Monroe, John Quincy Adams, Jackson, Harrison, Tyler, Polk, Taylor, Pierce, Buchanan, Johnson, Garfield, Arthur, Cleveland, McKinley, Roosevelt and Taft.

Chinese White Rabbits.

Probably more freight and more passengers are transported to China by the wheelbarrow than by any other land method. The wheelbarrow there used differs from that used by us, in the fact that the wheel is set in the center, and thus supports practically the entire load, while the handles are supported in part by a strap or rope over the shoulders of the man who pushes it. As a result, the wheelbarrow carries its load off the ground nearly a half-ton in its weight.

Shampoo for Shampooing.

The kind of shampoo that quickly relieves a hot scalp is a cure for itching piles or hemorrhoids. You will find this on sale at 10-15-4t

Value of Quick Decision.

As a rule the man who has trained himself to quick decisions and prompt actions follows close to the right. He does not need to debate questions, he loses the man who has become a master of deliberation. His mental facilities seem to work automatically and they are generally right. I'm not sure but that they are more often right than they are with the man who is constantly weighing pros and cons and becoming confused with the issues. He saves time because he acts quickly and he saves everybody the uncertainty of indecision.

"Life-Plant."

There is a creeping moss found in Japan called the "life-plant." It is believed to be indestructible by any means, except immersion in boiling water or the application of a red-hot iron. It may be cut up and divided in any manner, and the smallest strands will throw out roots, grow and bud.

Remarkable Crab.

A peculiar crab has been captured in the Indian ocean. It is nearly two feet in diameter and its longest claws are about a yard. It has projecting eyes like those of a lobster and is very voracious. It was put in a tank of sea water and when darkness came it proved phosphorescent, emitting peculiar white rays.

Sarcastic.

"Sometime," he replied the exasperated manager, after he had seen the ninth packageless patron leave his shop, "I'm going to put a showcase of gold dollars out front, marked down to 90 cents and see if you get rid of few of 'em."—Public Ledger.

That Air of Distinction

Nothing contributes more directly to this feeling than the wearing of the proper model in the proper kind of corset.
