Nevertheless it was a sad mistake about my writing insurance. I advocated eating Krause's candy and Tru Blu crackers and cake, and living forever. The item referred to appeared in Saturday's Observer, and, when some of the local insurance men read that Harnden was writing insurance, they began to get worried. ENFORCEMENT OF LAWS MADE FIFTY-ONE FOREST FIRE TRIES, PASS CASES INVESTIGATED.

Criminal Action Has Been Taken in 53 Cases in the State of Oregon.

A total of fifty-one forest fire trespass cases were investigated for legal action by the Forest Service in Oregon and Washington in 1920. The information just given out by Assistant District Forester Waha, of the Forest Service office in Portland.

Criminal action has been taken in forty-three of these cases and eight cases are still under investigation by the Government, says Mr. Waha. The report shows that these cases are the result of fires getting started in the National Forests of Oregon and Washington, the fires originating from a variety of causes, such as leaving camp fires burning, cigarettes, burning of brush without permit in violation of the state fire laws, defective spark arresters on logging engines, and incendiary. Mr. Waha points out that in spite of forest fire laws in Oregon and Washington and efforts of fire protective organizations, the State Forester, Government foresters, and private timber owners that people who use the forests still do not all realize the great damage and danger of forest fires. He also brought out that there is a healthy public opinion growing in the northwest against forest fires, as shown by a much smaller percentage of man-caused fires in 1920 than in previous years, and that a noteworthy feature of the past season was the hearty co-operation rendered by local county and state officials in the prosecution of these fire cases.
