If another bout is arranged it will be a hammer and tones affair as both have proved to Baker fans that they are willing to go all the time.—Baker Democrat.

Health Shows by Finger Nails— The rapidity of the growth of the nails is indicative of the health. The growth of the nails on the right hand is in most people more rapid than on those on the left hand. Another curious point is that the rate of growth of the nail depends directly on the length of the finger. Thus the nails on the two middle fingers of men grow more rapidly than those on the first and fourth fingers respectively, and those in turn are more rapidly grown than those on the little fingers.

Live Electric Plants— There are in all about 50 species of electrical fish, but the electrical properties of only five or six have been studied in detail. The best known are various species of torpedo, belonging to the skate family found in the Mediterranean and Atlantic seas; the gymnotus, an eel found in the region of the Orinoco in South America; the malfurcatus, the rascal or hunderer fish of the Arabs, a native of the Nile, the Niger, Senegal and other African rivers, and various species of skate found in the seas around Great Britain.

Heart Trouble Not Fatal— Heart disease is not the barrier to an active life of usefulness as has always been supposed, said Dr. Frederick Orsh to the National Society for the Promotion of Occupational Therapy. Nothing is gained and much lost by forcing cardiac patients not to work, he said, and it is better to have proper supervision of the person with heart trouble who takes a light job.

Joe T. Jones— "The trouble with a smart man," said Joe T. Jones, "is that he's liable to think more of his 'knowin' of things than of his 'skin'."

Traffic Expert Will Serve Port of Astoria

ASTORIA, Jan. 28.—Roger D. Pinneo, one of the most highly paid traffic experts in the country, has taken up his new duties as general traffic manager of the Port of Astoria as one of the broadside launches by the port commission in making this harbor one of the greatest of the world's shipping centers. Mr. Pinneo, comes to Astoria with 34 years of experience in rail and water freight transportation. He resigned his position as traffic manager of the Pacific Steamship company and the Admiral Line to cast his lot with Astoria because of his faith in the future of the port, backed by an unhampered port commission, an enormously productive tributary hinterland and market for world products and terminal facilities of the most modern sort. These shipping terminals are among the largest and finest in the United States and are situated within 12 miles of the mouth of the Columbia river with its 42 feet of water at low tide and on the largest fresh water harbor in the world.

Elizabeth Ann Given Buggy— Elizabeth Ann Hampton, a high school student, has been given a new baby buggy by her father, A. C. Hampton. The high school auditorium was the scene of a baby buggy presentation and many deep red bushes this morning. When well-known "Father" A. C. Hampton walked upon the platform, he was very heartily received by applause and finally, after some business had been transacted, well-known Charles Reynolds got up and told Mr. Hampton how much he thought of him but that the new Hampton baby had taken his place in his heart and that he, on behalf of the student body, had come before the high school students to present Mrs. Elizabeth Ann Hampton with a baby automobile and so some one rolled a large and exceptionally good looking baby carriage across the floor. Here was where Mr. Hampton began blushing and that blush lasted until he had arrived home at his own door rolling the carriage down the street and followed by a troop of high school students.

Many Gifts Showered Upon Superintendent's Daughter By Students and Faculty— Besides little Elizabeth Ann having a real carriage to ride in, the grade teachers and the A.T. Supervisor presented the young lady with a bank account of \$40, which Mr. Hampton says will help her out a great deal when the young lady enters college some three or four years hence. All grade teachers of the Riviera, Central and Greenwood schools presented the bank account to Miss Hampton.

She was also presented with a silver mug, a spoon, and a knife and fork, by the high school faculty. Mr. Hampton says that Miss Elizabeth Ann will be ready to make her debut into high school society soon, and as soon as she is big enough for him to handle, he has promised to bring her up to see the students.
