

TOMORROW "SNAPP'S"

Will feature another tremendous favorite in their line of

Krauses' Candy

It's "PECAN ROLL," 80c per pound. Just see how it's made, in the big daylight home-candy kitchen of Krause's home.

A soft roll of fudge-like fondant, delicately flavored and a rich tan in color, is covered with warm cream caramel and smothered in sweet tender pecan meats. That's all, and that's a whole lot in terms of deliciousness.

Remember, we're getting it fresh so often you'll always be surprised at its goodness, for that and many other reasons. Get a few dainty slices of it, munch the first one, and watch yourself come back to SNAPP'S for more!

A Drug Store that carries a large stock of almost every kind of goods that large city drug stores carry is the kind that Silverthorn's Family Drug Store is, and a store that does a large prescription business, probably the largest of any city of similar size in Oregon. A drug store that always endeavors to tell its customers the true facts concerning the goods they sell. We notice they are remodeling their Soda Fountain and a new, high-class soda water man will be in charge in a day or two.

BAKER COUNTY HAS MOST LAND UNDER WATER IN THE STATE

BAKER, Apr. 5.—Although Baker county has the largest acreage of arid land that is capable of irrigation, it has the largest amount of land under irrigation of any county in the state, according to a report of the United States census, received before the Chamber of Commerce last week.

The amount of arid land in this county is placed at 284,000 acres, and the next county to Baker is Klamath, with 59,000 acres less.

It was likewise brought out that improvements on roads and other projects would total \$1,000,000 for this year.

Proletariat.
The proletariat is Russia's need to denote the lowest and poorest classes. It is derived, through the French from the Latin proletariat, the name given in the census of Servius Tullius to the lowest of the centuries, who were so called to indicate that they were valuable to the state only as reapers of crops. The word has come much into use in the literature of socialism.

A Flying Furnace.
The average meteor when first seen is about 50 miles above the surface of the earth, and disappears from view at 50 miles. Thus, it travels 50 miles before the atmospheric friction burns it up. This friction, it is reckoned, raises it to a temperature of something like 3,000,000 degrees.

No Question.
"Hats," says the Times fashion correspondent, "are worn well up the head." We have always regarded this as the best place to wear a hat on.—London Punch.

Amateur Farmer's Error.
One reason why a town man sometimes fails at farming is because he looks more of the picturesque woods for rocks on his place than of the ground that's suitable for crops.

Precocious Youth.
The teacher asked: "Why do leaves turn red in autumn?" A small boy said: "Because they are blushing to think how green they were in summer."
