Gopher Killing Demonstrations—Gopher eradication work in the county was begun this week when a demonstration was given for the benefit of the farmers in the Mt. Glenn district at the home of Fred Zaugg. It developed there that gophers have been at work on trees from six to seven years old. They eat off the root and the tree falls over. In other cases the trunk is girdled below the ground during the winter and unless grafting is resorted to at an early date in the spring the tree dies. Demonstrations will be given in other parts of the county during the next few days, a demonstration being put on in Union yesterday.

discussed the situation. By the end of the week a summary of what the club has done will be prepared for publication in order that the question may be answered in more or less detail.

It was decided that those present should write personal letters to their friends here and in nearby towns, telling them of the unsurpassed opportunity to hear this world-famous orchestra. The general sentiment of those present was that the house would be crowded if the people of La Grande and Union county realize the exceptional opportunity in store for them.
