Pierre Talks Taxes—
"Do you know that more than 35 per cent of the income from rentals goes for taxes?" inquired Walter M. Pierre, of La Grande. "The figures, approximately, are between 35 and 40 per cent. In a few years, a very few years when we have all these state and county bonds to pay for, the percentage will run to 50 per cent. I wonder how many people are giving a little study to this problem of taxation? The commission appointed to investigate the tax situation will probably agree that there should be some kind of an income tax so that certain things can be reached which do not now pay their share. We shall have to put a top to the exemptions from taxes, too. There are many exemptions now and this list must be revised. Then there is the automobile. It is true that the auto pay a license, but

I believe that they should also be on the tax roll. They used to be and I consider that a mistake was made when they were taken off the roll. Why shouldn't my Ford pay \$5 a year taxes as well as the license, and the bigger and expensive cars in proportion? The tax commission will probably make some recommendations for drastic remedies to the next legislature, for everyone who is familiar with state and county governments, knows that there is room for certain savings."—Oregonian.

TO ESTABLISH SHEEP FLOCK

Farmers Should Not Hesitate to Pay Good Price for Ewes That Produce Thrifty Lambs.

In establishing a flock of sheep do not hesitate to pay a good price for ewes if they are exactly adapted, and especially for those that, when judiciously mated, are likely to produce lambs that will give the best return for the food which they consume. It is of the utmost importance to make use of rams that possess great individual merit, and strongly inherit the good points by which they are distinguished. Unless a ram has a good masculine head and stands firmly on strong legs he should not be selected, however great his merits may be in other respects. Breeding ewes should be kept in good store condition. Show condition and low condition both must be avoided.

BEST TIME TO TRAIN COLTS.

Mistake Not to Halt Foals and Teach Them to Lead During Infancy— Means Less Trouble.

It is a mistake not to halter foals and teach them to lead during infancy, when it can be done with less trouble than at any other time. A few minutes two or three times a week is sufficient, as they should be by no means pulled about so as to make them nervous, as there is then a risk of their falling cold. As well as the halter lessons the youngster should be taught to eat dry food, which he will soon do if it is held to him or if allowed to eat from the manger with his dam.

Care of Phones.
Once every so often give the telephone a thorough washing in alcohol. Take off the mouthpiece and pour alcohol through the little holes into a canner. Wash the receiver with a cloth wet with alcohol. Do not wipe the parts dry, but let the alcohol evaporate. Alcohol is one of the most effective antiseptics known.

"If it has a wringer it isn't a Laun-Dry-Ette."

—and you never need put your hands in the water—

The Laun-Dry-Ette has no wringer. After washing the clothes quickly and thoroughly, this electric washing machine whirls them dry for the line in one minute. This makes broken fasteners and buttons impossible—and makes it unnecessary to put the hands in the water. Phone today and we'll gladly demonstrate.
