catcher last Sunday in the ball game in this city, was very critically injured in a fall from a haystack yesterday. The precise details of the accident have not been received but the injuries were mostly of an internal nature and it was impossible to move him for some time. It is reported today, however, that he was taken to his home last night and hopes for his recovery are much higher today than yesterday. He is a lad of high school age.

Glad to Get Back Home.—There are no crops in the East like the crops raised in the Grande Ronde valley, according to Leo J. French, who returned several days ago from a trip to the East. Driving through the valley yesterday after his return he could see a big difference in the crops here and back East and somewhat understand why people back there don't want to believe the stories of the big yields of grain and fruit produced in this valley. French was accompanied by his mother, Mrs. Ida French, who visited most of the time at her old home in Ohio. They missed the Pueblo flood by about half an hour on their way east. He visited in New York state and in Canada and the return trip was made through Glacier National Park.

Cause of Appendicitis.
 When the bowels are constipated, the lower bowels or large intestines become packed with refuse matter, that is made up largely of germs. These germs enter the vermiform appendix and set up inflammation, which is commonly known as appendicitis. Take Chamberlain's Tablets when needed and keep your bowels regular and you have little to fear from appendicitis.—Adv.
