THE OUTBURSTS OF EVERETT TRUE—by Condo.

Hes of grain and hay fed remained practically constant throughout the whole experiment.

While the data obtained are not sufficient to warrant the drawing of final and definite conclusions, the indications are that no bad effects follow the feeding of dried apple pomace. There was no decrease in the milk flow nor in the yield of butter-fat.

When fed as described the dried pomace appeared to be equal, pound for pound of dry matter, to good corn silage as a succulent food for this dairy cow. Owing to the property which it possesses of absorbing large quantities of water and swelling, it should never be fed dry, but should be allowed to soak in water for an hour or so before feeding. The pomace appears to be a palatable feeding stuff.

Caution is advised in feeding dried apple pomace, as there is a possibility that the feeding of large quantities, or of quantities containing excessive amounts of apple seeds, might prove injurious. It appears to be safe, however, to feed as much soaked pomace by weight (1 part dried pomace to 3 parts water) as it would be to feed the same amount of pomace fresh from the cider press.

DRIED APPLES FOR COWS

Dried or "evaporated" apple pomace as a succulent feed for the dairy cow is the subject of a preliminary report from the Bureau of Chemistry and Animal Industry of the United States Department of Agriculture based on an experiment to determine the feeding value of dried apple pomace, especially its suitability as feed for cows in lactation. Preliminary results are reported because of a large number of inquiries on the subject.

The text of the report follows: It appears that there is a belief among dairymen that the dried product has a tendency to cut down the milk flow, or even cause cows to go dry, although apple pomace fresh from the cider press is generally recognized as being a good succulent feed for milk cows. To test the soundness of this belief, a feeding trial has been carried out by the department. Only one cow was used in this test, and the total quantity of dried pomace fed was less than 499 pounds; therefore, it must be borne in mind that the results obtained, while indicative, can not be accepted as conclusive.

In this feeding trial the dried apple pomace was fed wet and its feeding value compared with that of corn silage, since it is intended to be a succulent feed. The pomace was prepared by adding to the dry material three times its weight of water several hours before feeding, thus producing a feed similar in water content to that of corn silage.

For a period of 30 days the cow received a balanced ration consisting of grain, hay, and corn silage. The silage was then replaced by the apple pomace for a similar length of time, allowing a 10-day transition period for the change in diet, and after a like transition period at the end of 20 days the original ration containing silage was resumed and continued for a third 20-day period.

The quantity fed—36 pounds of wet pomace per day—was such that the total dry matter in the pomace equaled the weight of dry matter in the silage replaced. The quantity

K. O. M. PICNIC NEXT SUNDAY

Biggest and best affair of the kind since organization ten years ago planned for this year.

Not since the organization of the Kansas-Oklahoma-Missouri Association some ten years ago has the spirit of fraternalizing seemed so prevalent as this year, when officers and members have the feeling that this is bound to be the "biggest and best" ever held. Committees have been working well with the officers and the program promises to be well worth hearing. Besides this there will be some radical changes in the "doings" so all feel that one hour's entirely too short a time to devote to the cause and this year will see the plan tried out of "eating and visiting" and for two hours, the program commencing until two o'clock when it was formerly started at one. As arranged to date, the numbers presented at Riverside Park next Sunday afternoon are as follows:

Selection by orchestra; song, "America," by audience; recitation, "A Golden Smile and Folks Worth While," Miss Ina Watkins; selection by orchestra; song, "Are You from Kansas?" Mrs. Roy Titus and Miss Amy Mott; recitation, Mrs. Couth; selection by orchestra; reading, Mrs. Golden; etc.

entation, Miss Marion Miller; selection by orchestra; music, Miss Faye Golden; selection, L. B. Carter; music by orchestra; reading, Miss Eula Watkins; recitation, Putnam Yeck; song, Miss Eudelle Gray; five-minute talk, C. D. Huffman; recitation, Mrs. L. E. Hill, and ten-minute talk by Bruce Dennis.

The officers want it understood that any former Jayhawker, Sooner or Show-Me corn bread and sorghum eater who is absent from this picnic is going to be mighty sorry. "You all don't necessarily have to be a member of the association to attend, as all who came to Oregon from either of these three states are invited to bring their lunch baskets and help fill the festival board. The kids, too, will enjoy the occasion. The public at large is invited to attend the afternoon program. The registration books have been the means of renewing many friendships between individuals and families who thus became acquainted with the facts that "old time" and even "back door" neighbors were now number among those who are 100 per cent Oregonians.

All from Kansas, Oklahoma or Missouri, remember that the "tribes" will gather for the big annual pow wow next Sunday at Riverside Park. The usual big free treat, with coffee and cream, furnished by the association. Eats from 12:00 to 2:00; program immediately thereafter. You'll be glad you came if you KOM.

When you come right down to reason, what is there to "discount" tires —

THE next time a friend comes to you all excited about some wonderful tire bargain—ask him how much value he ought to get for each dollar of tire money.

It's astonishing that any car owner today should not know all the tire service he is entitled to.

Nor how to check up between the economy of par quality on one hand—and big discounts, surplus stocks, discontinued lines and retreads on the other.

For two years U. S. Tire makers have been telling the American people all about tires. They have laid open the tire business from every angle.

They have always led the fight for better tires.

They have consist-

ently maintained quality first standards with certain economy for the tire buyer.

They have established 92 Factory Branches all over the country. Perfecting U. S. distribution so that you get a fresh, live tire every time you buy a U. S. Tire.

So when a man once decides on U. S. Tires he knows what he is getting in quality—service—economy.

In support of his own judgment he gets the pledged word and reputation of the largest and most successful tire concern in the world.

A sound reason for the fact that you see more U. S. Tires on more cars than ever this year.

"You get a fresh, live tire every time you buy a U. S. Tire."

The U. S. CHAIN TREAD

One of the few tires of which it may be said that they deliver economy year in and year out and tire after tire.
