## MUCH WOOD IS USED IN WEST

Figures Show Necessity for Reforestation in Oregon Washington and California.

NEW YORK, Oct. 18.—Eleven mills in California, Oregon and Washington consumed in 1920 a total of 354,193 cords of pulp wood, at a total cost of \$4,240,150. The total consumption of the United States was 6,114,972 cords, valued at \$116,495,720.

The United States in that year, however, imported \$85,000,000 worth of newspaper paper, \$89,000,000 worth of wood pulp, and \$28,000,000 worth of pulp wood to operate its paper mills, while in 1918 the importation of Canadian pulp wood was only \$14,000,000.

These striking figures relative to the paper industry, are included in a pamphlet just published by the American Paper and Pulp Association, and prepared by the United State Forest Service in co-operation with the paper industry. These figures, says the Forest Service in analyzing the statistics given in this complete review of the use of wood in paper making, are evidence of the need for reforestation of the cut over lands of the United States. In its summary the Forest Service says:

"We cannot count upon reducing the amount of pulp used. That would be not only undesirable but probably impossible as well. We cannot count upon Canada indefinitely as a source of supply, for the Canadian forests are no more limitless than our own have proved to be.

"The great eastern pulp mills cannot be moved to the timber of Alaska or the West Coast.

"The trouble is, in brief, that we have mills without forests in the East and forests without mills in the West. The obvious solution will be to supply the deficiencies in both parts of the country. More mills will no doubt be located eventually on the Pacific slope and in Alaska. But what of the East, with its heavy investments of capital and its millions of waste acres?"

"Reforestation will take not only skill, energy, and money, but most serious of all, many years must elapse before the East can be put on a thoroughly self-supporting basis. Yet there is no choice left to us. The work must be undertaken. We must have pulp, and for every year of delay we must pay increasingly heavy penalties for neglecting to restore the forests as fast as the wood is consumed."

The detailed figures for California, Oregon and Washington which are thus made available through the co-operation of the paper industry and the Federal Forest Service, show a low cost per cord for the wood consumed because of the great domestic supply in those states. The three states only imported 200 cords of Canadian spruce in 1920 and the cost is also kept down by the use of over 200,000 cords of hemlock, together with 41,000 cords of white fir. Washington shows the use of 24,839 cords by the soda process, but for the balance the three states show only a slightly smaller reduction by the sulphite than by the mechanical process. The cost of the wood in these three states was almost the lowest of any region in the country. The average California-Oregon cost was \$14.04 per cord, as compared with a national average of \$19.63, and Washington's cost of \$10.90 per cord was only 2 cents per cord above that of West Virginia where the price was the lowest of all the states. The value of the pulp produced in California and Oregon was \$5,917,054, and in Washington of \$4,700,237.

The Forest Service, commenting upon the condition in the far west points out that the value of unsteamed mechanical pulp in Washington is practically the lowest of any state, and that the cost of pulp in Washington is the lowest of the states, keeping the cost of the manufactured pulp parallel to the low cost of the pulp wood. No figures are given for Alaska as production did not begin there until 1921.

**SOME GOOD BARGAINS IN CITY PROPERTY**  
A good rooming house for sale on easy terms, close in and always full. Brings in new from seven rooms, \$130 per month. This house has thirteen large rooms and one small one. The present owners are occupying six rooms. It can be made to bring in \$160 per month and leave ample room for owners if they don't care to occupy too much space. It has bath and toilet, both up and down stairs. Seven rooms are fully furnished with good furniture. All the carpets and linoleum on the floors goes. A large lot 50x135 feet, nice lawn, shade trees, on paved street and all street and sidewalk paid for. The price is \$9,000 with a cash payment of \$2,500; balance in monthly installments. This is known as the V. D. Long rooming house, just across the road from the post office. Now is the chance to get a good bargain and a money-maker from the start.

## WAGON FEEDERS TO RAIL LINES

Alaska Being Networked by Roads and Trails in Vicinity of New Rail Line

ANCHORAGE, Alaska, Oct. 18.—Territory on both sides of the United States government railroad being built between Seward and Fairbanks, Alaska, is being penetrated by wagon roads and trails which will serve as feeder lines for the railroad, according to Col. James G. Steese, chairman of the Alaska Road Commission.

During the past year \$206,654.82 has been spent on road work in a strip 100 miles wide along the railroad. Several quartz districts have been opened as a result of the road construction and, eventually, the mines will provide tonnage for the railroad it is thought.

Colonel Steese has recommended that the government adopt a ten-year road-building program which will tap every district in the railroad area and through connections reach sections in other parts of Alaska distant from the road.

**BAKERY CATS DOOMED.**  
BOSTON, Mass., Oct. 18.—The cat in the bakery must go. This is one of the orders just promulgated by the city health department, under authority of an act passed by the last legislature.

"Some bakers thought that cats were necessary in order to keep rats and mice away," said Dr. P. H. Malloway, deputy health commissioner in charge of the food inspection division. "The same object can be obtained, however, by proper physical construction of the baking plant, so we have abolished cats and all other animals."

Basement bakeries will not be permitted hereafter. Bakers must refrain from smoking or chewing tobacco in their establishments and must report to the health authorities any suspicion of contagious disease among their employees. Bakery goods must be properly protected from dust, dirt and insects.

## Do Your Children's Eyes Need Help?

Now is the time when the child with weak eyes is experiencing the most trouble. For hours every day and often under artificial light during the evenings, they have to pore over books. The constant strain is particularly telling. Even a slight weakness of the eyes develops rapidly under such a strain into something more serious.

Such children need glasses. Properly fitted lenses will take care of the overload. If cared for now the weakness may be overcome by the time the child is full grown. If not, the time will soon come when glasses will be absolutely necessary and doubtless for life. It is only fair to the child to make an effort to save them from this if possible.

If your children are backward at school work or complain of frequent headaches or smarting and stinging sensations in the eyes, have a competent optometrist make an examination.

Glasses fitted upon such an examination will relieve them from the tremendous strain under which they are now working. It will enable them to go through the days work with the snap and vigor natural to childhood. You will note an improvement in their work. And, best of all, you are saving their eyes for the future.

Our equipment is complete in every detail.
