

Age does not come with the blare of trumpets. It creeps along on velvet slippers—and we are old before we know it.

THE woman who carelessly accepts her graceful slenderness as a permanent gift of the gods is suddenly amazed to find that a few added years have brought unpleasant figure tendencies that accentuate her age and betray the smooth beauty of carefully preserved hands and face.

Nature needs help at any age—and just the right wisp of a corset worn in youth is a protection against the discouraging task of attempting to regain lost figure lines in later life. Good lines are far easier to retain than to regain.

Constipation. Constipation of the bowels is a stoppage of the sewerage system that removes waste matter from the body. It is as necessary that your bowels move regularly once each day, to carry off this waste, as it is that the waste pipes of our home be kept open and carry off the waste from the house. If you would enjoy good health, keep your bowels regular by taking Chamberlain's Tablets when needed.—adv.

SERIOUS TASTES

SOUTH HADLEY, Mass., Jan. 2.—Reaction from midyear examination sends the college girl to light fiction. So says Miss Bertha E. Blackley, librarian at Mount Holyoke college, in a review of college girls' reading tastes made public tonight.

Springtime is another period for pleasure reading, and she has found that during May twice as many books are read as in any other month.

In general, however, she says that since the war there has been a tendency to revert to the more serious books.

Perseverance is persistency in progress; obstinacy is persistency in paralysis.

Mosquitoes during dry seasons are rendered more dangerous to human beings by thirst due to lack of water.

There Is No Economy In Poor Vision

PEOPLE can economize on clothing. They can pare the household appropriation. The old car can be driven another season. Improvements on the property can be deferred. But glasses must be secured when they are needed. There is no scale of values by which the worth of good vision may be reckoned. Like good health, it is absolutely necessary for the performance of our daily duties and the full enjoyment of life itself. Such a priceless possession must be safeguarded, whatever the cost. Delay in securing glasses for weakening eyes is not economizing but the costliest kind of folly. You are not only experiencing discomfort, perhaps suffering, and depriving yourself of your full efficiency, but every day the eyes are without the assistance they need, their natural powers are retrograding the faster. Good vision is the most inexpensive thing you can secure. The small expense of proper lenses fitted by competent professional people makes the cost of good vision insignificant. If your eyes are not functioning properly if you have any reason to suspect that, as a matter of economy you should consult a reliable Optometrist at once J. H. PEARE & SON Optometrists
