See Us Now About Your Battery

Suppose some queer trick of fate made you the owner of this service station and me the customer.
And I came in some day red hot because my battery had gone wrong—
And I had missed my train—
And I lost out on an important engagement—
And disappointed a good customer—
And stood to lose a lot of money—
You bet your life I'd be good and sore, but I'm mighty sure I couldn't ask for any more courtesy and consideration and better dealing and SERVICE than we are giving right now day after day.
The time to have us look at your battery is before anything happens.

There Is No Economy In Poor Vision

PEOPLE can economize on clothing. They can pare the household appropriation. The old car can be driven another season. Improvements on the property can be deferred. But glasses must be secured when they are needed.

There is no scale of values by which the worth of good vision may be reckoned. Like good health, it is absolutely necessary for the performance of our daily duties and the full enjoyment of life itself. Such a priceless possession must be safeguarded, whatever the cost.

Delay in securing glasses for weakening eyes is not economizing but the costliest kind of folly. You are not only experiencing discomfort, perhaps suffering, and depriving yourself of your full efficiency, but every day the eyes are without the assistance they need, their natural powers are retrograding the faster.

Good vision is the most inexpensive thing you can secure. The small expense of proper lenses fitted by competent professional people makes the cost of good vision insignificant. If your eyes are not functioning properly if you have any reason to suspect that, as a matter of economy you should consult a reliable Optometrist at once
