

# FOREIGN GRAIN OUTLOOK GOOD

### Argentine Wheat Growing Well and Outlook Favorable in India.

WASHINGTON, Jan. 12.—Growing conditions for the winter wheat crop have continued favorable in Argentina, and a general feeling of confidence prevails concerning the yield of the new crop. The official estimate for the current season for the wheat area is 13,927,000 acres, compared with 14,957,000 acres in 1920-21. Harvesting is now in progress, but no official estimate of production has been issued. The condition of other cereal crops is generally good, and fair to good yields are reported. The condition of the linseed crop is poor, and a low yield is expected. Harvesting the wheat crop is in progress in Australia. Some complaints of damage from excessive heat are reported from various sections of the commonwealth, and in New South Wales, hushies and hailstorms have caused some damage. The preliminary official estimate of production is 146,614,000 bushels, compared with 148,799,000 bushels in 1920-21. Quality of grain is generally reported to be very good. The latest estimates of the wheat crop in the Union of South Africa are very favorable, giving the yield for 1921-22 as 8,449,000 bushels, compared with 8,112,000 in 1920-21. The area of wheat in New Zealand shows considerable increase, being reported as 365,000 acres, compared with 223,000 acres in 1920-21.

#### Favorable Outlook.

The fall crops of food grains have yielded well in British India and the outlook for the spring crops is favorable. Prospects for the wheat crop in the Punjab and Central Provinces, which together produce nearly half of India's total wheat crop, are very good. Rain is reported to be greatly needed in parts of East Decan, but conditions are fair elsewhere. In Bombay, rain is also needed in some sections of the coast. The second forecast for rice as issued by the department of statistics, India, gives the rice area for 1921-22 as 79,154,000 acres, or 102.5 per cent of 1920-21 and 102.7 per cent of the five-year average.

The second season forecast, which compares on an average about 74 per cent of the total area under sown in British India, gives the area for 1921-22 as 2,698,000 acres, compared with 2,221,000 in 1920-21. Seasoning in an important seed in India from which is made ginning oil. The first season forecast based on reports received from the provinces of Madras, Burma and Bombay, which comprise 89 per cent of the entire sown area of British India, gives the area sown for 1921-22 as 1,489,000 acres, compared with 1,447,000 acres in 1920-21, or an increase of 3 per cent.

The condition of the fall sown cereals is variable throughout Europe and in many sections the start has been made. Conditions of winter wheat, rye, and oats has been good in Great Britain and strong, healthy growth is reported. The condition of winter wheat and rye is slightly below average in Germany and slightly above average in Austria and Poland. The continuous drought hindered seeding in Hungary and has curtailed the acreage somewhat. Conditions have been favorable in Romania, and fair acreage had been sown. Seeding and growing conditions have been very unfavorable in Russia due to the long drought which has curtailed seeding and hindered good germination. Recent rains have been beneficial in Southern Africa, and a large acreage of wheat and other fall cereals is being sown. Fall-sown wheat entering the winter in good condition in Canada and the area sown shows an increase of 10 per cent compared with last year. The winter wheat crop of the United States has the very low 1921-22 condition of 70 per cent of a normal, while the average of the preceding 10 years is 83 per cent. The condition of the winter rye crop is better than the average decrease in yield.

The prospects for the winter crop in British India are good. The forecast of the department of statistics, India, gives the cotton area for 1921-22 as 17,855,000 acres, compared with 19,794,000 acres in 1920-21, and the yield as 3,622,000 American bales of 500 pounds (gross weight), compared with 3,450,000 bales in 1920-21. On the basis of these figures the average yield per acre of the present crop for all India is 97 pounds, compared with 74 pounds last year. The yield of the cotton crop just harvested in the United States is 8,340,000 bales of 500 pounds (gross weight), compared with 13,440,000 in 1920. The cotton crop in Egypt also shows considerable decrease, being 634,000 bales of 500 pounds (gross weight) in 1921, compared with 1,251,000 in 1920.

#### Bilious Headache.

When you have a severe head ache a disordered stomach and constipation, take three of Chamberlain's Tablets. They will correct the disorders of the liver and bowels, effectually curing the headache.—adv.

### MORE SAFETY DEVICES.

(By Associated Press)  
WASHINGTON, Jan. 12.—Forty-nine of the larger railroads of the United States, serving practically all sections of the country, were ordered by the interstate commerce commission today to show cause on or before March 15, next, why they should not be required to install complete systems of automatic train control devices on their lines.

The commission tentatively decided to make it mandatory upon the railroads concerned to install the devices by July 1.

The roads made subject to the installation requirement today, the commission said, are those on which traffic conditions and other considerations make such safeguards most desirable.

### ITALIAN GROWN SEED IS POOR

WASHINGTON, Jan. 12.—Farmers who purchase clover seed should demand information as to the place of growth of the seed they sow. On account of the apparently increasing difficulty experienced by farmers in securing and maintaining their clover stands in recent years, specialists of the department have been studying the behavior of plants grown from imported clover seed some time ago, and in 1916 trials of Italian red clover seed, in comparison with that of American origin, were commenced. These trials were carried on in co-operation with experiment stations or with private individuals in various states, and reports were received from, or personal inspection was made of, trials in Michigan, Wisconsin, Minnesota, Ohio, and Tennessee.

In Tennessee all the plantings failed because of unusually bad conditions. In the other states the Italian clover killed out in some places but not in others. For example, at Kalamazoo, Mich., the stands were nearly all killed, while at Menominee, in the Upper Peninsula, under a heavy blanket of snow, all the plants came through equally well. In some cases the Italian plants were badly attacked by a summer disease, which did not injure the plants from American seed. This was the case at Grand Rapids, Mich., Madison, Wis., and in Ohio.

The entry of the United States into the war interrupted the work, but it was taken up again in 1920, when seed of Italian and American origin was sown at three stations in Wisconsin, and at Lanesville, Ind., Grand Rapids, Mich., in Tennessee, Idaho, Washington and Oregon. The reports in the spring of 1921 showed that at Ashland, Wis., 50 per cent of the Italian clover had been winterkilled, and at Spooner, Wis., all had been winterkilled, while the American plants suffered little injury. At Marshfield, Wis., the Italian plants were completely winterkilled, while the American plants suffered 50 to 60 per cent injury. In Indiana the Italian plants were completely winterkilled, while the American plants did not suffer. At Grand Rapids, Mich., there were lost over 10 per cent of the plants left on the plots seeded to Italian seed, while those seeded to American seed lost from 15 to 50 per cent of the plants estimated to have been on the plots to the fall of 1920.

In Idaho, Washington and Oregon the Italian plants did not suffer from cold, nor were they notably diseased except in Idaho. However, in Washington the total dry yield of the Italian plants was considerably lower than that from the American plants.

### INDEPENDENCE IN SCOTLAND

(By Associated Press)  
LONDON, Jan. 12.—No more there is an agitation for the independence of Scotland. Some members of the Scots National League, which stands for complete separation from England, recently met in London, and to the wild strains of the bagpipes, affirmed their determination to fight to the death, to gain complete and absolute independence for Scotland.

Speakers recalled that in 1706 Scotland was a free country with a national debt of only one shilling and seven pence per head of the population. Today every Scot is owing 177 pounds. Scotland's contribution to taxation last year amounted to 113,487,000 pounds, but only one-quarter of this was devoted to Scottish purposes, they complained.

The great of a Scottish secession has never failed to rouse anything more than a tolerant smile from the general public.

"A GOOD OLD-FASHIONED PHYSIC"  
Foley Cathartic Tablets, wholesome physic, thoroughly cleanse the bowels, sweeten the stomach, tone up the liver. For indigestion, biliousness, bad breath, bloating, gas, or constipation, no remedy is more highly recommended. Wm. O. E. Bieler, Hammond, Mich., writes: "I have given Foley Cathartic Tablets a thorough trial and I can honestly recommend them as a mild but sure laxative. They work without griping. Give stout persons a free, light feel."

# COMMUNISM IS SUPPRESSED

(By Associated Press)  
BELGRADE, Jan. 12.—Communism seems to have been suppressed in this country. The vigorous action of the government which recently passed a law imposing the death penalty upon enemies of public security and offenders against the state has struck terror into the hearts of radicals and revolutionaries.

The jails of the country are choked with persons accused of Bolshevik or Communist activity and others who are not in prison are declared to be either thoroughly coward or to have fled from the country. These persons implicated in the murder last July of M. Drachkovitch, the Minister of the Interior, and in the attempt to assassinate Jugoslavia's young king, Alexander, will be brought to trial some time this month. Among them are a number of Communist deputies in Parliament.

Jugoslavia's statesmen assert that the entire Communist party, aside of formidable and menacing proportions, has been suppressed as a result of fearless action by the government so that many of its members have been exiled or imprisoned.

The Parliamentary privilege of Communist members of the National Assembly, numbering nearly 60, have been cancelled and since August, none of them has participated in the proceedings. Communist newspapers and propaganda organizations throughout the country have been suppressed and their principals placed in custody or exiled.

### TAX LAW VOID.

(By Associated Press)  
HELENA, Mont., Jan. 12.—The state supreme court today declared unconstitutional the "bachelor tax law" passed by the last legislature and the poll-tax law, which has been in force for more than 21 years.

The poll-tax affected all men from 21 to 69 years of age. The bachelor tax was imposed on all men more than 21 years old who were not heads of families.

### RELIC KILLS.

(By Associated Press)  
MANILA, Jan. 12.—Ned Van Vochter, 7, was killed and his brother, Peter, 6, was injured, perhaps fatally, when a three-inch shell and to have been brought from France by their father, Edwin M. Van Vochter, of the 45th infantry, exploded at Fort McKinley today. Ludlow Gibbons, 8, year-old son of Captain James R. Gibbons, also of the 45th infantry, was slightly injured.

### Smoked Ceilings.

Smoked ceilings that have been smokeless, no oil lamp may be cleaned by washing with soda water.

### WORTH CONSIDERING.

The question is not so much how you contract a cold, but how to get rid of it with the least loss of time and inconvenience. If you will consider the experience of others under similar circumstances, you will secure a bottle of Chamberlain's Cough Remedy without delay, and use it faithfully. There are many families who have used this preparation successfully for years and hold it in high esteem. It is excellent.—adv.
