St. Peter's Episcopal Church.—Corner 4th and O Sts. Next Sunday is Septuagesima, or something like seventy days prior to Easter. The date is only meant to suggest that from now on we should be anticipating the great feast of the resurrection. Accordingly, from now on we must lay stress on the thing most essential in the Gospel, namely, its power over death. The Rector is planning his Sunday morning sermons with this in view. It recommends a course of life and conduct which is above defeat. We have the usual Sunday services—Holy Communion, 8 a. m.; church school, 9:45; morning prayer and sermon, 11:00; evening prayer, 7:30 p. m. All are invited.—Jos. W. Gunn, rector.

Presbyterian Church.—Sunday school at 9:45. Regular services at 11:00 and 7:30. Rev. W. H. Bleakney of Walla Walla will speak both morning and evening. Young people's meeting at 6:30.

THE FOUNTAIN OF YOUTH

Ponce De Leon came to the new world seeking the fountain of youth.

Youth! The magic word! Youth means wealth and energy, health, cleanliness and everlasting strength.

Ponce De Leon did not find the fountain.

But it is here in this world, for all that.

James Watt, who discovered steam and developed the steam engine, was the first to find this fountain.

Following him into the new world of science have come innumerable others, studying, working, developing, until the very fountain of youth is here at hand in the electric light and power industry.

Through the application of electric light, heat and energy in manufacturing establishments, commercial houses and in the home, unsanitary conditions have been almost abolished. Dust and dirt need not exist; excessive heat or cold can be tempered; tension and strain on employers and employees and on house wives are taken away by a hundred different uses of electric power.

Innumerable ills are avoided. Above all, energy is saved and energy is youth!

Back of this new force are the huge dams and water turbines, where water power is used, or the stupendous steam boilers, turbines, engines and generators, wires of high tension transmission lines and the infinite web of innumerable smaller wires stretching out over the country.

Here is a fountain of eternal youth, indeed! But, it must be fed. It has been fed to the amount of billions of dollars by thrifty American citizens who have put their savings into the securities of the electric light and power industry.

There are still millions of people to be added to the home patrons alone of electric light and power companies. Vast capital must be invested to supply their requirements, and it can be attracted only if present capital is treated fairly.
