MIDDLE WEST WHEAT POORER

Reports indicate that Yield Will Not Be As Satisfactory As Expected; Labor Plentiful.

WASHINGTON, Feb. 28.—Crop conditions for the first half of February are covered in reports received by the Bureau of Markets and Crop Estimates, United States Department of Agriculture, from its field agricultural statisticians in the different states. A considerable surplus of corn still remains on farms and is being used freely to help the farm feed supply. Prices are gradually advancing, but marketing still continues to be slow. Planting is in progress in southern Florida.

Further deterioration of the wheat crop is reported in the central and western counties of Kansas due to the drought and strong winds. The condition of the crop is only fair in Nebraska; rain is needed in the southwestern districts of the state and in southern Iowa. The early sown crop in Oklahoma is fair but much of the late crop has not yet sprouted or is showing a poor stand. Some winter killing is reported in the northern section where the crop has been protected by snow. The condition in the eastern section of the country is generally good and little damage reported. The condition of the far western states is favorable. General rains and warmer weather have benefited the crop considerably in California.

The condition of the winter crop generally continues good. Some damage from alternate freezing and thawing is reported in Indiana. A considerable increase in acreage is reported in North Dakota. The outlook for the crop of cotton is still uncertain but some increase in acreage is discussed. Increased sales of improved early seed are reported in Georgia, in early seed is necessary to escape weevil ravages. The soil is in excellent condition for planting in Texas. Much interest in co-operative marketing is reported in South Carolina.

The condition of the Irish potato crop in Florida is good and the acreage increased over last year. Preparations are being made for early plantings in the southern states and an increased acreage is indicated. Considerable surplus still remains in the hands of farmers in North Dakota and Wisconsin. A slight increase in price is reported.

Much interest is manifested in the coming sweet potato acreage, especially for early marketing. A large quantity of slips than usual is being bedded out in Georgia. Fruit trees are generally in good condition and very little damage to buds is reported. Some damage has probably been done to peach buds in southern New England by the recent low temperatures. The condition of the orange groves is generally good in Florida. An increase in the acreage of strawberries is reported in Louisiana, Mississippi and Arkansas. The condition of livestock is generally favorable and very little disease is reported.

Considerable interest in dairying is reported in the southern section. The prospect for the spring pig crop in Iowa and Nebraska is reported to be fair. The sheep industry in Idaho is recovering from past depression and the outlook is favorable. Considerable increased interest is being manifested in poultry raising. Ranges in Arizona and California are in good condition. The snow covering has necessitated heavy feeding in Idaho. Clover and alfalfa fields have been damaged by the severe weather in Indiana but are reported to be in good condition in Illinois. Some damage from the ice coating is feared in southern New England.

The supply of farm labor is plentiful and generally exceeds the demand. Farmers are employing as little help as possible and are doing their own work where they can manage to do so. Wages are reported as getting lower.

POOR RELATIONS WORK HAVOC WITH BRIDES HAPPINESS.

A domestic comedy that turns into a tragedy when poor relations insist upon cluttering up the Newly Weds' little home with their unwelcome selves, is "Her Face Value," in which Wanda Hawley will be seen here today at the Arcade Theatre.

Of course, it all comes out right in the end, but not before the young married pair, Jimmy and Peggy, have been unhappily separated by the ever-present in-laws, in this case the bride's shiftless father and even more shiftless brother, whom she had all was practically supported during her girlhood days when she was a hard-working little chorus girl.

After Jimmy leaves her, Peggy goes back to the chorus, but from that career she is lured into the movies and becomes a star, a life which she hates, because she is frightened by the antics she is constantly called upon to perform.

Finally, she is injured by a bad fall, and her absent Jimmy hastens to her bedside. They are reconciled and Peggy's lazy father and brother told to hunt jobs.

ADVANCE FEES ARE WAIVED

WASHINGTON, Feb. 28.—Requirements that grazing fees on stock using national forest ranges be paid 30 days in advance were waived in an order issued by Secretary Wallace, permitting the payment of fees this year in two installments. Under new regulations issued payments must be paid on or before the date stock enters national forests and on or before December 1, 1932, without interest on the deferred amount.

Secretary Wallace said that grazing permits would be issued at the time of initial payment, but each permit would contain a stipulation that failure to make final payment would cause revocation of grazing preferences. In 1921 more than 38,000 livestock owners grazed 2,139,500 head of cattle and horses and 7,455,000 sheep and goats in the national forests of the western states, the department said.

Because of the poverty to which so many of the clergy have been reduced by the war many parents have ceased to regard the church as providing desirable careers for their sons. There are 4,000 fewer clergy working in the parishes of England than in 1914. If the Church were to meet its requirements, the Bishop said, it would have to make way for democracy. The last vestige of caste and class distinction should disappear from the ministry and ordination should be as open to the sons of the artisan as of the squire.

NOT ENOUGH MINISTERS

LONDON, Feb. 28.—The Bishop of Durham says the Church of England cannot find ministers enough to fill its pulpits. The number of men annually ordained since the war has been less than one-third of those annually ordained before the war.
