PACKED HOUSE GREETED SENIOR CLASS PLAY

(Continued from Page One.)

to brother and sister, proved one of the many bright spots in the play with their parents' difficulties a close runner up.

Every member of the cast acted out their parts with a finesse seldom found in amateur circles. Especially well were the parts of Clarence, Eobby and Cora Wheeler played by Ted Larson, Alfred Meier and Ruth Hill.

During the intermission between the first and second acts the boys' double quartette sang three selections in a masterly manner. The orchestra furnished several numbers during the other intermissions. The orchestra and the double quartette were under the direction of Miss Francis M. Birney, supervisor of music in the La Grande schools and in training of the members of the two organizations she has been unusually successful. The numbers last evening showing that not only the members of the cast but the members of the musical organizations that aided in making Clarence one of the best amateur performances ever presented here, had been thoroughly coached. The task of selecting appropriate pieces in one which is of almost as much importance as the acting.

To Stop Mine Fires. A new method of checking fire in mines is by means of boxes of fine rock dust suspended across the roof of the tunnel. Any shock due to an explosion is sufficient to cause them to break away from their supports, and the finely divided dust falls into the passage and prevents the flames from spreading.

The H. & S. Electric Co. is making a specialty of re-fitting and decorating old lighting fixtures. The result is most surprising. They take your fixtures to their own shop, re-finish it in any of the modern and up-to-date finishes, and place it in your home the next day as good as new without smelling up your house with bronzing solutions and acid odors. Ask them about it. 3-11-11
