**BUILDING TO
INCREASE SOON**

(By Associated Press)
CHICAGO, Mar. 23.—Further impetus to the building industry, which shows marked improvement after being stagnant since the World War, is expected from the interlocking meetings here of the National Lumber Manufacturers' association, April 4 and 5, the National Construction Conference under the direction of the National Federation of Construction Industries, April 3, 4 and 5, and the American Lumber Congress, April 6 and 7. President Harding and possibly Secretary Hoover will speak.

It is predicted that closer identification of the lumber organizations with the construction industries will aid substantially toward the revival of building, and joint meetings will be held to this end. Over 1,200 dealers in the industries are expected to attend the conferences which are described as a "Three Ring Circus" of the building industry.

The National Federation of Construction Industries has invited representatives of building trade labor.

It is hoped, according to Secretary W. B. Hay of the Federation, that for the first time in this country results of progress in construction industries may be coordinated into one great demonstration. More than 25 associations and firms will prepare displays showing developments. A construction industry dinner will be served April 5. Business will be transacted by various concerns. It is expected, and action will be taken on problems before the industries.

The National Federation of Construction Industries comprises all elements of the building industry from engineers to plumbers. The National Lumber Manufacturers' association represents lumber producers. The American Lumber Congress includes manufacturers, retailers and representatives of wood-using industries.

**EIGHT HOUR
DAY TOO LONG**

(By Associated Press)
PARIS, Mar. 23.—Madame Curie,

discoverer of radium, appears to be taking her duties as member of the Academy of Medicine very seriously. She was present when the academy discussed reforms in secondary education and spoke in favor of shorter hours of study in high schools. The motion under discussion was to the effect that the time devoted to classes and home work should not exceed eight hours for the lower classes and nine for the higher.

Madame Curie gave her opinion that eight hours was too long for the smaller children and the motion was therefore sent back to a subcommittee for reconsideration.

**"---and we are a healthy,
happy family now"**

—Louis Gingras

TINGLING with abundant energy, appetites hearty, nerves strong and steady and their faces radiant with the glow of perfect health, the entire family of Louis Gingras, 9 Harrison Ave., Providence, R. I., are an eloquent tribute to the powers of Tanlac, the greatest family medicine the world has ever known.

"I've put Tanlac to the test four times right in my own family and it hasn't failed me once," declared Mr. Gingras. "My wife, my son and my daughter, as well as myself, have all been built up from a half-sick, run-down, worn-out set of people into a healthy, happy family thankful of new life and energy."

And the experience of this family is only typical of thousands of others whose statements are on file in the Tanlac office. Hardly a day passes that does not bring scores of such messages of praise from every part of the United States and Canada from families where mother, father, son and daughter have all found health contentment and the joys of living through simply taking a course of Tanlac.

Take, for instance, the case of John Widner, 1571 Roosevelt Ave., Los Angeles, Calif., who says: "My wife, myself and little boy are now as healthy, happy a family as you will ever see—and it's all due to Tanlac."

Or that of Mrs. John Marquis and her family of sixteen living in Manchester, N. H., at 292 Belmont St. She says: "Tanlac has been the only medicine used in our house for two years and it has kept every one of the sixteen in the best of health."

In Chicago, Frank E. Richards, of 441 South Wood St., writes: "We will never be without Tanlac in our house after the remarkable way it has built up my wife, my son and myself to where we are the very picture of health."

Representative of New York is the case of Chas. E. Van Colt's family, residing at 129 Fourth Ave., Albany. He says: "Every member of our family is enthusiastic over Tanlac. It's certainly a medicine for all the family."

From far-away Canada comes this message: "My little girl, my son and myself are all enjoying splendid health now and Tanlac brought it all about." Mrs. Bert Hower, 193 East Avenue, Toronto, Ontario.

"We call Tanlac 'The Family Medicine' here in our Virginia home, because it restored my mother and sister to perfect health, just the same as it has done me," is the enthusiastic statement of Mrs. J. F. Robertson, Danville, Va.

And on through the list, men, women and children from every state in the Union and every province of Canada unhesitatingly come forward and

**TRIAL DISCLOSES
PROPAGANDA**

(By Associated Press)
SOFIA, Bulgaria, Mar. 24.—The trial of former Prime Minister Radostoff and his Ministers brings to light every day fresh details of the sinister influences that brought Bulgaria into the war on the side of the Central Empire.

Witnesses state that the Germans began by systematically buying up the Bulgarian newspapers, working through a consortium of German financiers, among them the Mannesmann Brothers. A propaganda service was organized under a certain Captain Engelhardt, and soon only German news appeared to the exclusion of all other.

Engelhardt also lavished money on the postal and telegraph employees, as well as on police and Customs House officials to facilitate the passage of munitions through Bulgaria to Turkey. A witness at the trial testified that 45,000,000 marks had been set aside for this propaganda work.

**South Sea Dances
Given O. K. by a
New York Court**

(By Associated Press)
NEW YORK, Mar. 23.—Soothed with the judicial verdict that the dance art of the South seas, grass skirts and all, can't be worse, if as bad, as our native shimie, four fair dancers, arrested when they "shocked" Manhattan police detectives Wednesday, were free to practice their imported movements as they will.

Gilda Gray, Betty Wanders, Dorothy Conroy and Helena Kuski so

Telephone Service

The difference between what it costs to render the service and the value of the service to the people who use it is what measures the value to society of the discovery and development of the telephone. The fact that telephone service can be and is produced at a cost and sold to telephone subscribers at a price very much less than the value of the service to the subscribers constitutes the assurance of the stability of the business.

stirred watching detectives who visited the uptown cafe in which they were engaged, that they were arrested at a stage of an immodest exhibition. Their costumes, Detective Andrew McLoughlin told Magistrate Dougan, were modeled after Ganga Din's justly famous uniform.

Then one of the fair defendants donned her dancing garb—over street dress—for the edification of the court, whereupon it was decided that Manhattan's modesty remained unscathed.
