

COUNTRY CLUB WILL ELECT

This evening at 7 o'clock, the membership of the La Grande Country club, will hold their annual meeting, at the Foley hotel, where they will banquet together, talk golf, hear the reports of the past year, discuss plans for the coming year, and elect eight directors to serve with the seven directors who hold over for another year.

Reservations have already been made by about fifty of the members. Others who find it impossible to attend the banquet, are urged to come in time for the business meeting of the club, which should begin about 7:45.

CHATS WITH YOUR ELECTRIC MAN

No matter how good our service is, there is usually one man on the block who is forever finding fault with it. You know the man we mean. He is a good fellow at heart and talks sanely enough upon other subjects, but when he discusses this company's service he loses his balance completely.

What we regret most, however, is not that this man is sour against us, but that his attacks are permitted to go unchallenged by his friends who are also our friends.

In other words, you and hundreds of other satisfied customers in the same neighborhood take good service for granted, accept it, and say nothing. Your silence thus becomes his golden opportunity. With lips sealed, you innocently give him an encouraging slap on the back.

We value your good will, everyone's good will. This company is your company, the public's company. Now let us work together to correct this man from a loose-knotted booster.

Amundsen to Radio Reports of New Arctic Expedition

By Bob Dorman

(Copyright 1929 by N. E. A. Service NEW YORK, Apr. 3.—Secrets of the North Pole are to be unlocked by the airplane, the movie camera and the wireless telephone.

"Modern instruments of science," says Captain Roald Amundsen, "will give to the farmer, the manufacturer and the seafarer information of incalculable value of the Far North's mysterious effect upon conditions here."

Amundsen, discoverer of the South Pole, is in New York preparing for a four-year historic expedition that will start June 1.

"By ship I shall float with the ice fields over the roof of the world," he said. "Airplanes will take us over the North Pole. With movie cameras we will get a photographic record that will never perish. And by radio I shall be in daily touch, if necessary, with civilization, relaying reports that otherwise would be hidden for years."

Exploring Made Easy.

Amundsen, in his fifties, with graying hair and face lined by years of battling with the desolate ice fields of both ends of the earth, talks of his remarkable plans as if at his leisure had made over the path of the explorer.

"Until we know all about our planet we are like children walking in the dark," said Amundsen. "A million square miles of unknown territory lies within the Arctic Circle."

Amundsen's ship, "Maud," lies at Seattle. He estimates it will take

the mysteries of the Far North. But they have not been equipped as we will be. We will not be prisoners in the ice as I have been before, and as all Arctic explorers have been.

"From the ship we can sail miles by airplane over a radius of 100 miles. Observations of upper air conditions and photographic maps will be easily made. Our radio will keep us in constant touch with the world.

"The best of it is that our information will not be stale when we send it back. Our radio will take care of that.

"Our daily radio reports on the weather, the water, the air and the ice of the North Pole may have distinct value to the people of the United States and Europe.

"The weather, even as far south as New York is tremendously affected by the Arctic conditions, just as ocean currents further south are influenced by currents in the Arctic."

"Hundreds of explorers," Amundsen explained, "have tried to solve

Amundsen will occupy the queer double position of leader and chief cook!

"You see," he laughed, "I am a sailor, not a scientist. I am going to take the scientists over the top of the world to study it, and I shall personally see that they do not go hungry while they are doing it."

Amundsen's Record.

Captain Amundsen discovered the South Pole in 1911. Previously, between 1903 and 1906, he traveled through what mapped the long sought Northwest Passage.

Last year he made a survey of the Arctic regions just above Alaska, preparatory to the trip beginning this summer.

After leaving Seattle, the "Maud" will put in at Nome, Alaska, and off Wrangell Island, in the Arctic Circle, the drift with the ice will begin.

Chief of the scientific research work with the expedition will be Dr. H. U. Sverdrup. Aviators and radio operators will be Lieut. Oskar Omdal and Lieut. Uld Dahl, both of the Norwegian navy.

Put us to Sleep.

HOPE WANING IN ENGLAND

LONDON, Apr. 3.—Until lawn tennis is cultivated among British boys to the extent that it is in the United States and Australia, declares a prominent writer, "we can never feel hopeful about the return of the Davis cup to these shores."

He says that "even the churches" encourage the game in Australia, while inter-school matches are a feature of the summer term. The writer calls attention to the fact that the Australian stars, G. L. Patterson, J. O. Anderson, P. O'Hara Wood and J. H. Hawkes, all won the Boys' Singles Championship of their country.

Excellent Remedy for Constipation.

It would be hard to find a better remedy for constipation than Chamberlain's Tablets. They are easy to take and mild and gentle in effect. Give them a trial when you have need.—adv.

Have You Kidney or Bladder Trouble

READ THIS:

Madera, Cal.—"I suffered for three years with catarrh of the bladder, having tried every remedy I heard of, but without relief. Finally I saw Dr. Pierce's Anurie advertised and, like a drowning man grabbing at a straw, I thought I would try it also, which I did with great success, as it relieved me almost immediately, before I had taken all of the first package, so I continued, and would say to all those suffering from their kidneys or excess uric acid, try Dr. Pierce's Anurie tablets and suffer no more. I am now well and in Dr. Pierce's debt for the cure."

Your health is your most important asset. So why not write Dr. Pierce, President Invalids' Hotel, Buffalo, N. Y., and receive confidential medical advice, free, or send 10c for a trial pkg. tablets.

Optometrist

As constant dripping water wears away the stones, so trivial eye defects uncorrected will ruin the best of eyes.

Let the preservation be the first law of eye care and save regrets in after life.

Efficiency and good eyes go together. The latter may not bring efficiency but 100% efficiency cannot be present without good eyes, for they are the main avenue to accomplishments in all walks of life. The man with defective eyes cannot compete in the strenuous life of this day and age.

For competent eye examination consult us. Our equipment is the most modern.
