CHATS WITH YOUR ELECTRIC MAN

The automobile has taught us a lot about the thing we call "depreciation." When some of us bought our first car for a thousand dollars, say, we kept track of the gasoline and oil we used, and congratulated ourselves that the upkeep was but as bad as we had thought.

Pretty soon, however, we needed new tires and a few repairs—all maintenance expense. And then in about three years we got ashamed of the old rattle box and considered ourselves fortunate to sell it for \$200. What became of the \$700 difference? We charged it to depreciation.

The merchant has it in shelf-worn goods. The newspaper owner, has it to the extent of about ten per cent annually on his plant. Your electric company has it in the wear and tear and breakage of poles, wires, meters, machines and other apparatus.

It is by recognizing depreciation as a fixed charge that we are able to constantly substitute new equipment for old and so give you the service you demand.
