REGENERATION IS PREDICTED

(By Associated Press)
ADANA, Cilicia, Apr. 27.—Signs of the coming economic regeneration of Asiatic Turkey grow more abundant as United States companies through their representatives here announce new concessions obtained from the Nationalist government at Ankara for the exploitation and development of the country. Three important concessions have been announced by American experts within recent weeks and others are under consideration. One American company announces that it has obtained a 75-year lease in the port of Mersina which is to involve extensive works in the construction of the port and town. Another American company has secured a concession to construct two important railway lines. A third company has arranged with the Ankara government for the exploitation of the Anatolian mines and electrical power for the lighting and industries of the villages of Adana, Angora and Konia. All the concessions are subject to demands that Turkey only be employed and the Ankara government to receive a share of the profits.
