MRS. FRANKIE LUPER PASSES

Frankie Luper of Heppner, who died in that city recently, was a native of Oregon, having been born on her father's donation claim in Lane county 62 years ago. Her mother died when she was 2 years old and she was raised by her grandparents. Her mother's maiden name was Catherine Milligan and her father was Elijah W. Rhea. Her childhood was spent near Eugene. On January 11, 1882, she was married to James N. Luper. They lived on a farm near Irving, and have their children, Letta and Rhea, were born. Twenty-two years ago they moved to Morrow county.

Mrs. Luper was past matron of the Eastern Star lodge and was a member of the Rebekahs and of the W. O. W.

She is survived by her husband, James N. Luper; her daughter, Mrs. Alfred E. King of Portland, and son, Rhea Luper of Salem, formerly of La Grande, besides the following brothers and sisters: C. A. Rhea of Portland; T. A. and J. P. Rhea of Hillsboro, Or.; Mrs. Edna Brackett of Mrs. Lillian Pies of Portland, Or.; Mrs. Pete McCarter of Vancouver, B. C.; Mrs. Andrew Tildard of Douglas, Wyo.; Mrs. Ada Wyatt of Santa Cruz, Cal.; Mrs. Nellie Barnard and Mrs. Estella Veatch of Fossil, Or.

PASTURE LANDS FOR SALE.

SPECIAL.

While they last, twelve tooth garden rake—regular price, 60c, my price, 35c. Melville's Hardware. Pay cash and pay less. 5-3-1f

RADIO EXPLAINED

By E. H. LEWIS
INSTRUCTOR NEW YORK Y.M.C.A. RADIO SCHOOL

THE EFFECT OF LIGHTNING.

It is quite a rare thing for an antenna to be actually struck by lightning. If such a misfortune should occur, however, there would be nothing to do but rebuild most of the antenna system and perhaps a portion of the house. The antenna is usually connected to the ground either through the receiving instruments, the sending instruments, or by means of lightning protection, such as a switch or arrester, may be employed. The fire underwriters' rules call for such protection, and it would be well for any who contemplate the installation of apparatus to familiarize themselves with the local regulations. It is not the purpose of this article to deal with regulations covering installations.

Lightning at considerable distance from a receiving station may cause annoyance because of interference with the received signals, music or speech. When lightning flashes occur they are discharges of electricity from one cloud to another or from a cloud to the earth. These discharges produce very great electrical disturbances in the medium called the "ether" and create waves which are radiated just like the radio waves. When the waves so created reach a receiving station there are electrical oscillations created in the antenna, whose frequency is that of the antenna circuit. It makes little difference in this case to what frequency (or wave length) the antenna is tuned. The lightning discharges affect it just the same. If the lightning is close by the noise produced in a telephone ear piece is extremely loud, and it would be a good plan to stay away from the instruments. The sound produced by this kind of "static," or, in fact, by most kinds, is not musical, but harsh and irregular. If the lightning is a considerable distance away the sound created by it in the telephone ear pieces (head telephones) will not be so loud, but will still be harsh and irregular. The approach of a thunderstorm could very nicely be detected while the sky is still clear by listening in with a receiving set.

Lightning or less spectacular electrical discharges in the atmosphere at very considerable distances from the receiving station are responsible, to a large extent, for a large amount of the "static" noticed in the summer months.

The effect of ordinary static in a receiver may be partly reduced by using what is known as a "loop antenna," sometimes by indoor antennae and usually even by reducing the size of an outdoor antenna. Static cannot, however, be entirely eliminated in this manner without also eliminating the desired signals.

A Herald-Examiner Feature.

Former La Grande Girl Prominent In An Entertainment

The following item appeared in a recent issue of the *Frederick (Kansas) Herald*, Alladen Moore being a niece of Floyd McKennon, of La Grande and a former resident of the Grande Ronde valley:

Friday, April 21 being the last day of school in the Butts district patrons and friends gathered at the schoolhouse at the noon hour, each bringing a basket of lunch, and a most beautiful dinner was enjoyed by pupils, teachers and guests numbering about 200 in all. Mr. Lewis Martin as principal and Miss Marie Martin in charge of the primary grades, have given splendid satisfaction and the school is very fortunate to obtain their services for another year. In the afternoon an excellent program of songs, recitations and dialogues was given. A most pleasing number was a farce entitled, "When You and I Were Young—Maggie." This was marriage ceremony in which six little ET7 ceremony in which little six year old Alladen Moore was the blushing bride and ten year old Marie Galbreath was the groom. The dramatic preacher, Lawrence Lamoreaux, performed the ceremony and put the contracting parties through a rigid cross examination as to their qualifications for matrimony, and finally requested the bride to kiss the minister, which she did. Four little darky girls dressed in white, wreaths of flowers and tinsel and big bows of ribbon on their heads, acted as flower girls and carried the bride's train.

LA GRANDE BOY AT THE O. A. C.

George K. McDonald, son of Mr. and Mrs. P. A. McDonald of La Grande, is a junior student in the school of agriculture. He has taken an active part in student affairs and is a member of the farm management club, Phi Delta Theta fraternity and agricultural club.

The selection of an agricultural major at the beginning of the junior year in agriculture is allowed all agricultural students. The majors which a student may elect from are: general agriculture, zoology, soils, agricultural education, farm management, farm crops, farm mechanics, agricultural economics or sociology, poultry husbandry, entomology, botany, bacteriology, agricultural chemistry, pomology, vegetable gardening, horticultural products, vegetable gardening, animal husbandry, dairy husbandry production or manufacturing.

Mr. McDonald elected farm management for his major. The farm management course of study is designed primarily to fit the student for operating a farm of his own or as manager and at the same time prepare him for rural leadership. The student on completion of the work as outlined by the farm management department should be able in addition to that of farming engage in county agent or club work, teaching of agriculture or experiment station work and the like. The course is broad enough to include all the fundamentals of agriculture and at the same time include enough of the social sciences to give the student a broad outlook on life.

TWO FOUND DEAD.

(By Associated Press)
NEWTON, Mass., May 4.—William B. Powell, manager of the T. G. Dun & Co. office in Boston, and his wife, Lena, were found shot to death in their home on Essex road Tuesday night. Mrs. Powell was the widow of the late R. H. White, a prominent Boston merchant.

SALMON RUN HEAVY.

(By Associated Press)
ASTORIA, May 4.—Columbia river salmon fishermen returned to headquarters last night reporting a number of 400-pound catches for the first few hours of the 1922 season. Small salmon are running thick, the casters reported.

Highest price paid for clean, large-sized cotton rags.
