"KING, QUEEN, JOKER" GREAT COMEDY.

A story of unusual thrill, coupled with exceptional comedy features makes Sydney Chaplin's Paramount production of "King, Queen, Joker," which will be shown at the Arcade Theatre today only, one of the outstanding picture offerings of the season.

Mr. Chaplin is quite out of the ordinary, and one may get an idea of its cost when a trip to England, France and Switzerland of nine weeks duration was made by the entire company just to film some of the scenes.

A number of innovations in picture producing were used by Mr. Chaplin in the making of the production, one of them being the use of airplanes to carry the company to distant locations, practically inaccessible by any other means of transportation.

With the induction of many novel stunts into this picture, Mr. Chaplin's offering is said to be an unusual one. Lottie MacPherson heads a capable supporting company.

Four snappy acts of vaudeville are also on tonight's bill.

"FOOLISH WIVES" AT SHERRY'S LAST DAY TODAY.

If you were to take passage on a French liner, with a liberal letter-of-credit, if in time you reached Monte Carlo, that gloriously sunny Paradise of the Riviera, and there watched others, and yourself indulged in play at the Casino tables; if you dined at the Cafe de Paris, wandered under the southern moon in the farnate gardens, and indulged for the moment in any of the passing phases of folly—you would return with the memory of a seeming dream—so rare and strange is the life you would observe.

And yet you would be as innocent as a babe of the real Monte Carlo—its true undercurrents of life: its beautiful women, whose personal adornment is an epitome of the wealth of the earth; its soldiers of fortune, its rogues, both male and female, and their parasites and their prey.

You would perhaps see on the surface the elegance and extravagance of the ultra smart set, and perhaps note the jostling of splendor and splendor in the crowds that throng about the halls of the goddess of Fortune. Of the motives and acts beneath this comedy of elegance you would be, could be, but dimly aware. To get behind the scenes would require such wealth, leisure and loss of character as but few, even in this wicked world, would care to give.

Faithfully to recreate this atmosphere and truthfully to present the drama of existence there, Universal has spent nearly two years in time and more than a million dollars in money.

For the last times today, the Sherry Theatre will have for you a magic screen, and there in the comfort of a theatre seat you may store up for

yourself a memory more impressive, and of deeper significance to you than would the overcast journey itself.

COUNTY TREASURER'S CALL FOR GENERAL ROAD WARRANTS.

Evils of Constipation.

Perhaps the most serious of the diseases caused by constipation is appendicitis. If you would avoid this dangerous disease, keep your bowels regular. For this purpose Chamberlain's Tablets are excellent, easy to take and mild and gentle in effect.—Adv.

Hot?

You know how much easier it is for you to overheat after you have over-eaten.

Batteries are almost human. The battery that overheats and puts you to a lot of trouble, due to warped or buckled plates, is the battery that has been allowed to over-charge.

There is a mighty simple remedy for overheating of batteries. If you haven't tried it you'll be surprised to find how well it works. Here it is: TURN ON YOUR HEADLIGHTS THE REST OF THE DAY WHILE DRIVING.

We can tell you some other things about batteries that will save you trouble and expense. Come in anytime.

Is Your Car Short of Breath?

WHY MOTORS NEED NEW PISTONS Piston wear occurs in every motor. And, with the wearing of pistons, the piston pins and rings also wear. No wear in motor, or car, makes itself so thoroughly evident as does the wear in these important parts.

Despite the best lubrication possible, each of your pistons, as it travels up and down, wears against the cylinder walls. Have you ever thought how fast, and how far, these pistons travel in going back and forth, back and forth, up and down, millions of times through the cylinders? One "mathematical sharp" figures that in 10,000 miles of automobile travel a single piston in the average six-cylinder motor makes over 50,000,000 strokes up and down the cylinder walls. Therefore it is easy to understand why pistons, piston pins and piston rings wear—even with the best of lubrication.
