Baker's View—

"It was brought out at the Kiwanis luncheon today that through some unfortunate circumstances the Chamber of Commerce failed in its duty as host for the visitors last evening at the natatorium. The first night of the natatorium week. The chamber had invited members of the La Grande Ad club and of the Commercial club to Union to attend and enjoy a swim in the nat. T. G. Montgomery in addressing the Kiwanis today called attention to the fact that there were but ten members of the chamber present and the guests left to their own resources for entertainment. He felt that Baker had fallen down, especially in view of the fact that the chamber had but recently been royally entertained by the commercial organizations of both places. The unanimous opinion was expressed that something should be done by Baker to retrieve itself in the eyes of the neighboring towns."—Baker Herald.

Rates To Be Lowered
On July First

Mr. Hoover's proposals, asserting that basic coal costs influenced prices of so many other commodities that cuts in rates on it, particularly upon bituminous coal, would have a beneficial effect. The farming interests were not so urgent, particularly in view of the fact that agricultural rates went down while the discussion was before the commission.

stood for "full freedom in business and a recognition of the larger right of the individual to control and operate his own business affairs."

The pending tariff bill, which he helped draft, was a prominent subject of Senator Watson's address. It would do much, he said, to restore business and prosperity. Protection he added, had been a proved policy.

"This tariff," he added, "is not being made to please free trader. We did not formulate it to suit importers."

The Fordney emergency tariff law, the senator asserted, had "saved the wool and sheep industry" and been of immense value to the dairy interests.

Soldier bonus legislation is assured "before the close of the present session," according to Senator Watson, who declared it would "involve no additional taxation, and finally will be paid by the use of bonds of our debtors."

Reduction in railroad rates and wages must come, Senator Watson said, together with financial maintenance of the carriers, but he declared that railroad wages should not and would not return to pre-war levels.

Discussing the shipping situation Senator Watson said there was gross waste by the post administration. He commended the reorganization work of Chairman Lasker of the shipping board, denounced the five per cent private operation contracts, and advocated the administration ship subsidy proposal.
