OUNCE AND HALF STRAWBERRIES
HOOD RIVER, June 22.—While numerous city gardeners and ranchers are experimenting with various other varieties of strawberries, the Clark Seedling, propagated about 40 years ago in the Mount Tabor district of Portland, remains the staple commercial variety of the Hood River vicinity. J. W. Swope, local architect, who is an enthusiastic amateur gardener, has exhibited berries of the New Oregon variety from his city plots that weigh an ounce and a half. G. A. McCurdy, Oak Grove, orchardist, yesterday presented to S. J. Moore, cashier of the First National bank, two hallocks of berries of the Marshall variety that weighed an average of an ounce each.
NEGLIGENCE IS INCREASING
(BY Associated Press)
BALTIMORE, June 22.—Are drivers of motor vehicles becoming more negligent, less careful of their own safety?
It would seem so from actual observations made by the Baltimore & Ohio railroad. For more than two years this railroad has been placing men at crossings where there are usually a large number of machines crossing and take down the license numbers of those whose drivers fail to take any precaution to assure themselves that it is safe to pass over the tracks. This safety precaution consists of the driver's slowing down or stopping, and then looking and listening. When a driver dashes over without taking any of these precautions, his license number is noted and a card telling him of his negligence is sent him, with request to guard his life and property the next time he goes over a railroad track.
In the year 1920 the Baltimore & Ohio observers took note of 398,000 vehicles in the states through which it operates. In that year, according to the records of these observers, there were 25,690 drivers who failed to take any precautions at highway crossings. This was 6 per cent of the total observations made.
In the April of this year there were 16,477 automobiles checked by the
