# LARGE CROWD AT THE DANCE

The dance given by the strikers [illegible] Hall last evening was a [illegible] success. By nine o'clock the [illegible] for the beginning, the [illegible] and from then on [illegible] more or [illegible] arriving. The strikers were there en masse, as well as all who sympathize with them.

This is the first dance given by the strikers and they are well pleased with the crowd that attended. Everybody had a wonderful time and the music, by Wise's orchestra, was very good. The dance closed at twelve o'clock when the strains of "Home, Sweet Home" sent the revelers homeward bound.

Another dance will be given for the strikers at the Zuber Hall on Tuesday.

# VOLCANO IS BEING EXPLORED

HILO, Island of Hawaii, T. H., July 7.—Drillings into the volcano of Kilauea on this island, in the hope of discovering some means of harnessing the steam and heat of the natural phenomenon and utilizing the resultant power in industry, have brought to light the apparent existence of iron and copper in the mountainous crater, according to scientists directing the drilling.

The material through which the drills are sinking consists of a siliceous ore containing iron sulphides and [illegible] which indicate the presence of copper.

The drilling, which was interrupted by the recent activity [illegible] Halemaumau, the active pit of Kilauea, has been conducted under difficulties due to the excessive heat of the region and the fact that live steam rises in clouds and condenses around the borings.

The steam, however, is only surface steam or water vapor caused by seepage of rain from the ground surface, and the drills are not yet down to a depth where it may be determined whether there is sufficient steam at a high enough temperature to furnish steam that may, in turn, be used commercially.

The heat at the present depth of the drilling appears to be fairly constant at a temperature of 96.3 degrees centigrade or approximately 204 degrees Fahrenheit.

The question confronting the scientists is whether this heat will increase as the drills bite their way through the lava rock, which has proved difficult of peutration at some points where only three or four feet resulted from entire operations of a day.

The first hole attempted was driven approximately 20 feet when it was found that the rock beneath was tilted at such an angle that the drill was directed on a slant which would have made extrication of the tools impossible. This hole was capped and another started with the same result, but more favorable conditions were found in several other locations and it is hoped that eventually the drills may dig their way down at least 100 feet. The drilling experiment is of tremendous interest to scientists and geologists who hope that it may solve the question of what is beneath a volcano.

ASKS FOR NEW TRIAL

SALT LAKE, July 7. — Thomas Ramage, attorney for Omer R. Woods, former probate judge in Idaho, who was found guilty by a superior court jury here Tuesday on a charge of having murdered his wife, will ask for a new trial for his client, according to announcement.

PRESS IS ALARMED

WARSAW, July 7.—The Jewish press of Poland is alarmed over the proposal of the United States government to extend its immigration restriction to 1925. This, according to the Jewish Courier of Warsaw, "means disaster for the Jewish emigration of Eastern Europe." A fund of 150,000,000 marks (about $37,500) has been organized by the Jewish American committee here for the building of quarters for Jewish refugees, thousands of whom are pouring into Poland from Russia.

# M. W. OF A. HOLD MEETING

The local lodge of the Modern Woodmen of America held a meeting last evening in the K. of P. Hall for the purpose of initiating a number of candidates. The meeting was very well attended, the degree team from Union, a new camp, being present, and taking part in the initiatory exercises.

After four initiates had ridden the goat to the satisfaction of their initiators, a delicious banquet was served and following the eats the men devoted an hour to a general good time.

This evening the Union camp will hold a meeting and invited the La Grande lodge to be present. A number of local Woodmen are going to attend.

# STAGE DRIVER MAKES PUBLIC HIS EXPERIENCE

[illegible]

"After a man has suffered as long and as much as I have he can hardly help praising the medicine that restored him to health," said M. Kuiel-man, 441 Rose St., Portland, Ore., who operates an auto stage between Portland and Vancouver.

"For six or seven years I suffered terrible from stomach trouble. My appetite got down to almost nothing and the gas and pains in my stomach almost drove me distracted. I also suffered from constipation and had awful headaches. I had rheumatism in my legs and feet so bad I could hardly drive my car and was so nervous and upset life was simply miserable.

"But Tanlac has built me up eleven pounds in weight and put me in the best of health again. I can eat anything I want without any discomfort am no longer worried with constipation or headaches, and the rheumatism has entirely disappeared. My wife has also taken Tanlac with splendid results. It certainly is a grand medicine."

Tanlac is sold by all good druggists.—Adv.

# BLISTER RUST SURVEY BEGUN

(By Associated Press)

MOSCOW, Idaho, July 7. — The survey of the timber sections of the state to investigate the spread of the white pine blister rust will be carried on this summer through the cooperative efforts of the University of Idaho school of forestry and the federal government, according to S. B. Detiler, in charge of the federal investigation.

Parties of students and faculty members from the school of forestry left here last week and will survey the entire state during the summer, inspecting all white pine timber areas and cultivations of black currants for traces of the disease.

It was thought until this fall that the disease had not reached the western timber until a report of its discovery in British Columbia and western Washington was made. Measures are being taken promptly to arrest its growth before it invades the great white pine districts of northern Idaho.

One of the peculiar characteristics of the disease is its inability to spread from pine tree to pine tree. It can only be transferred from a pine tree to a currant or gooseberry bush, cultivated [illegible] being especially susceptible to the infection. From these bushes it then spreads to pine trees of the five needles or white pine variety.

Tamed Without Being Tanned.

Australian Paper—"The play presented was Shakespeare's 'Taming of the Shrew.'" We seem to recall that Petruchio flourished a whip in one scene, but we don't think he actually trounced the obstreperous lady.—Boston Transcript.
